

# C4 Regions Explainer

## Part 1: Individual Regions

# Starbased to C4

## Systems spawn Regions

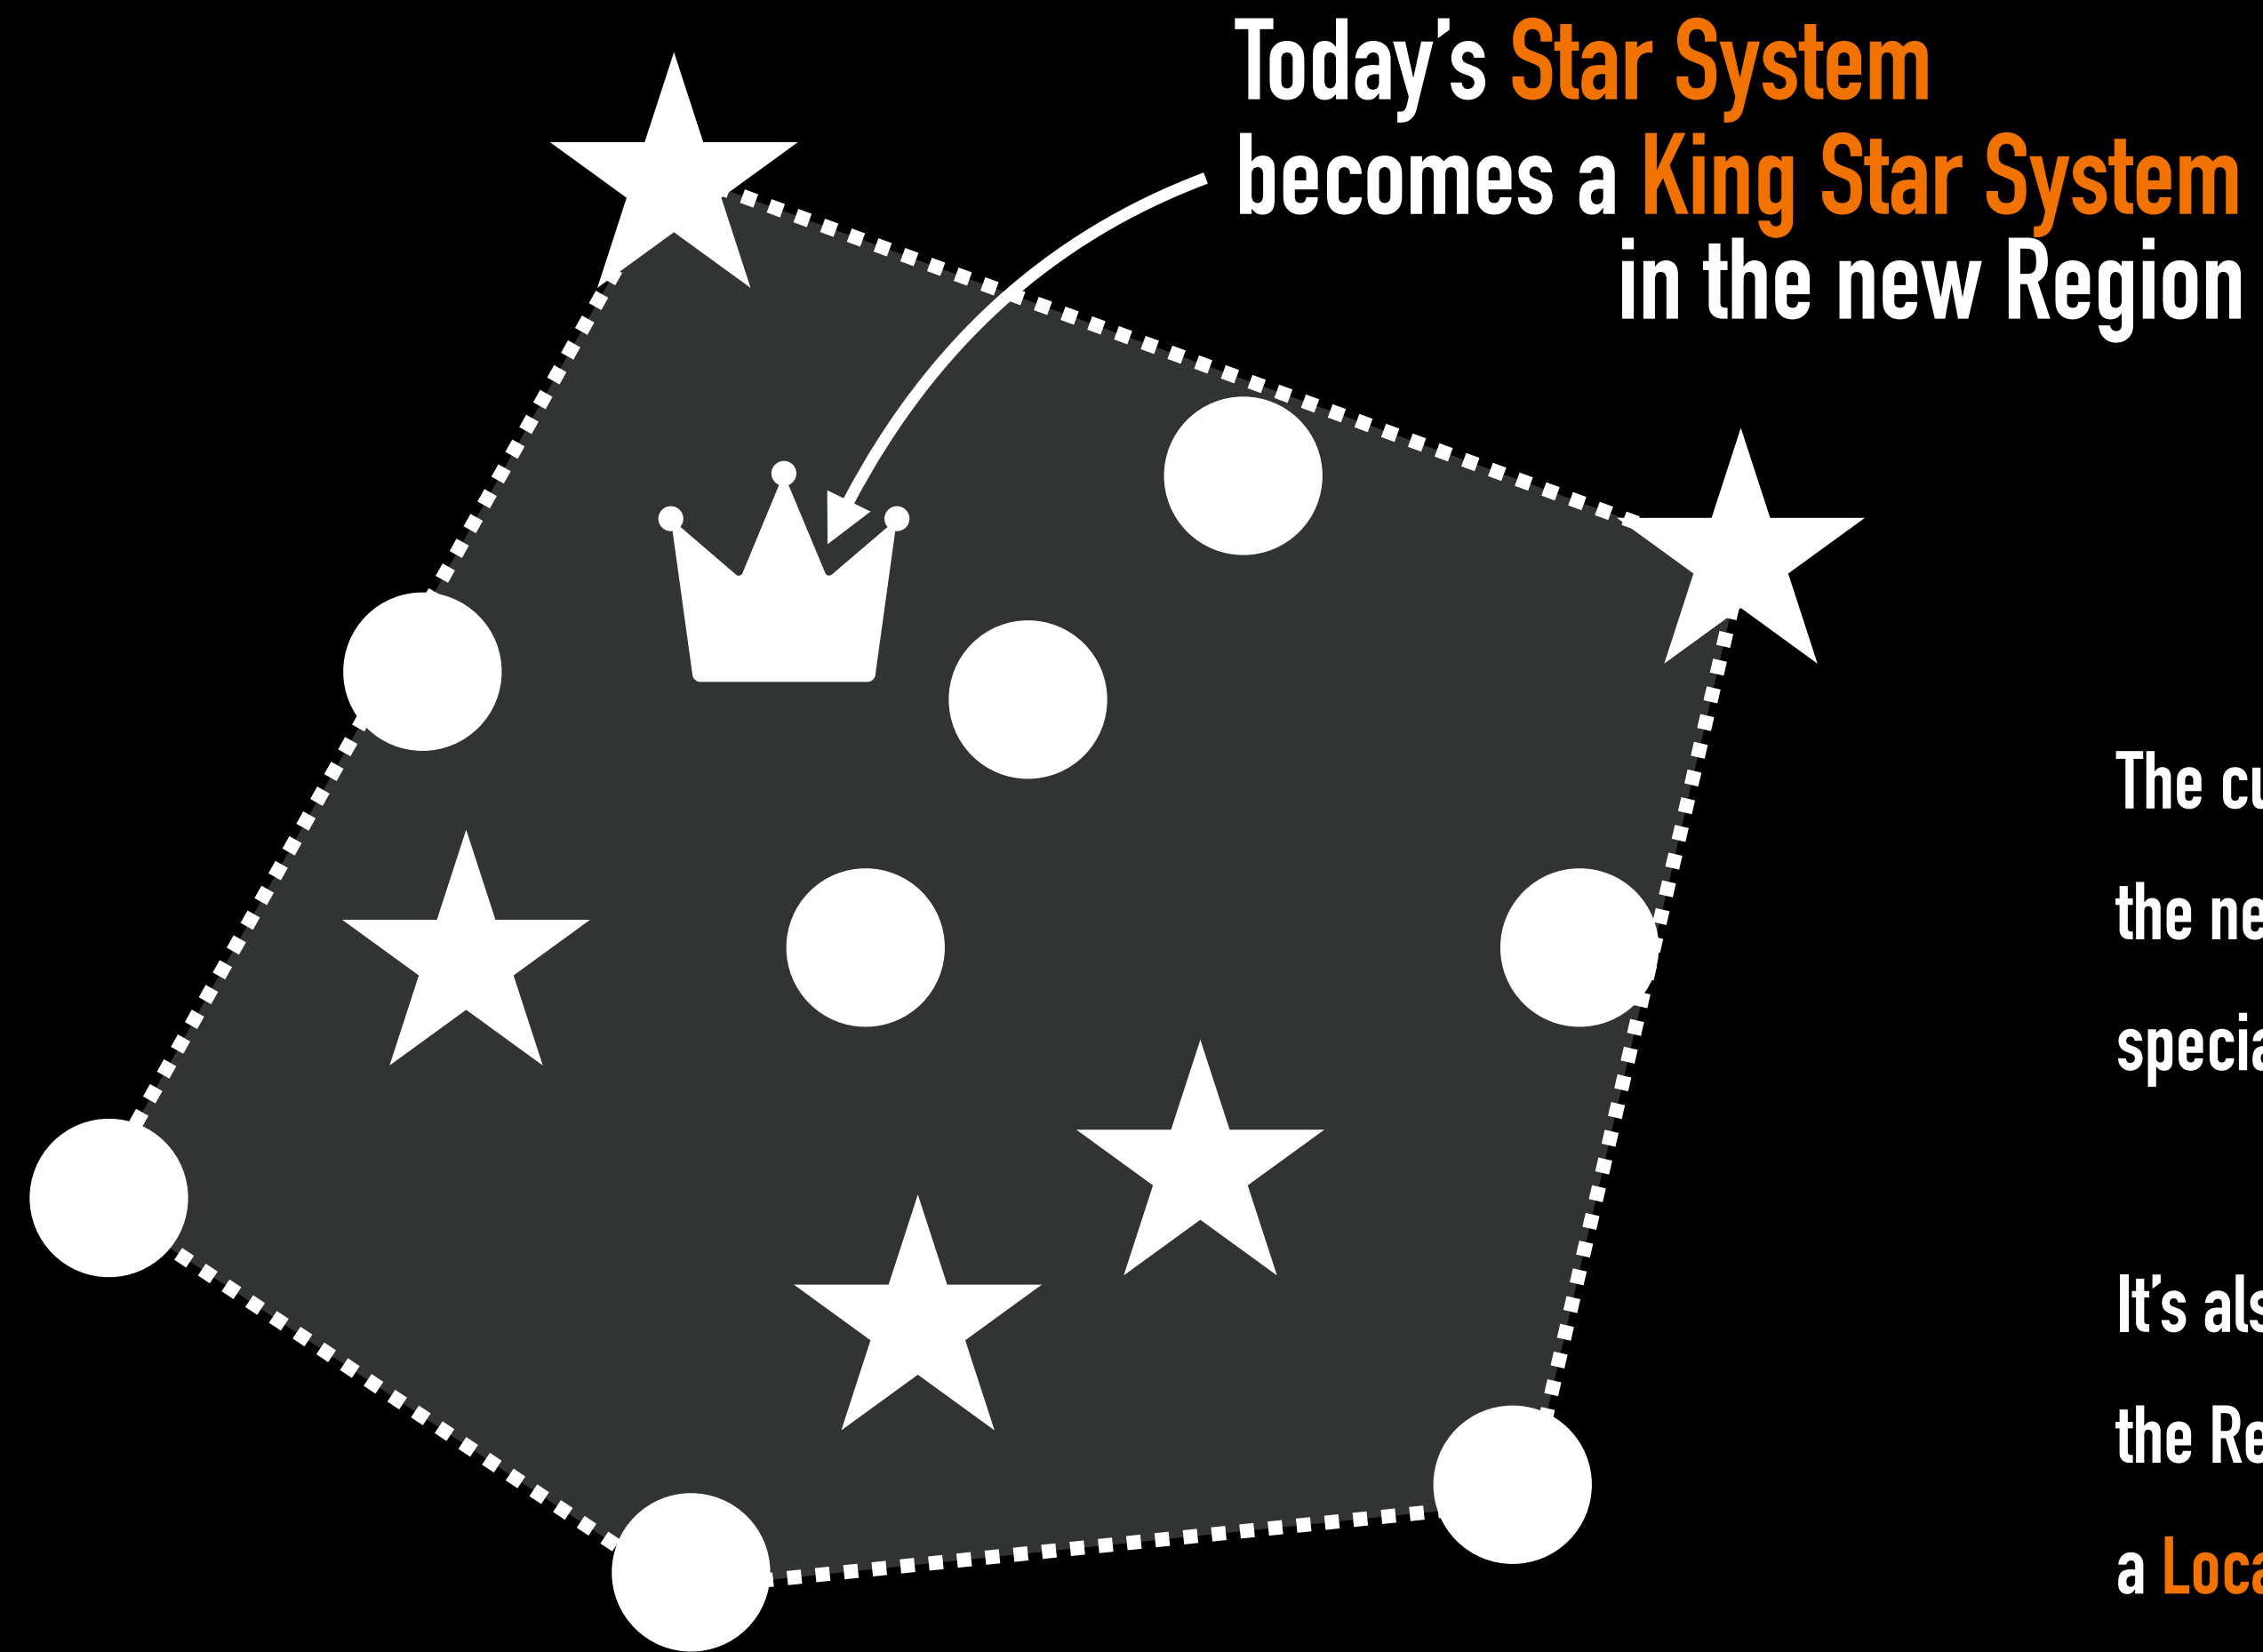

Today, Every Faction owns 5 Star Systems in the Safe Zone, and another 12 in the Medium Risk Zone.

Every one of these systems will evolve into a Region, made up of that one System and newly spawned neighboring Systems.

# Regions

System → King System

The current system will transition into the new Region's **King System**. This is a special type of **Core System**.

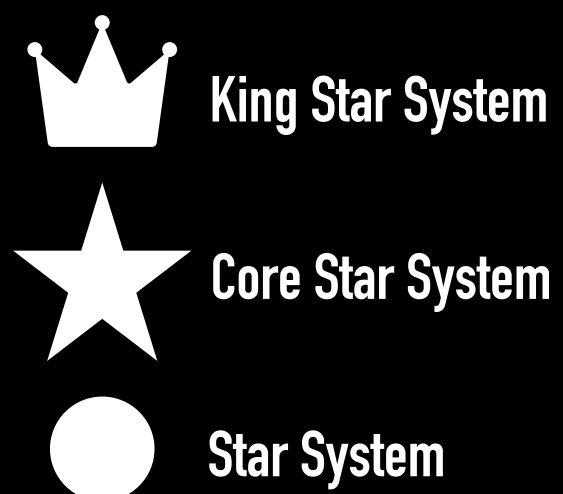

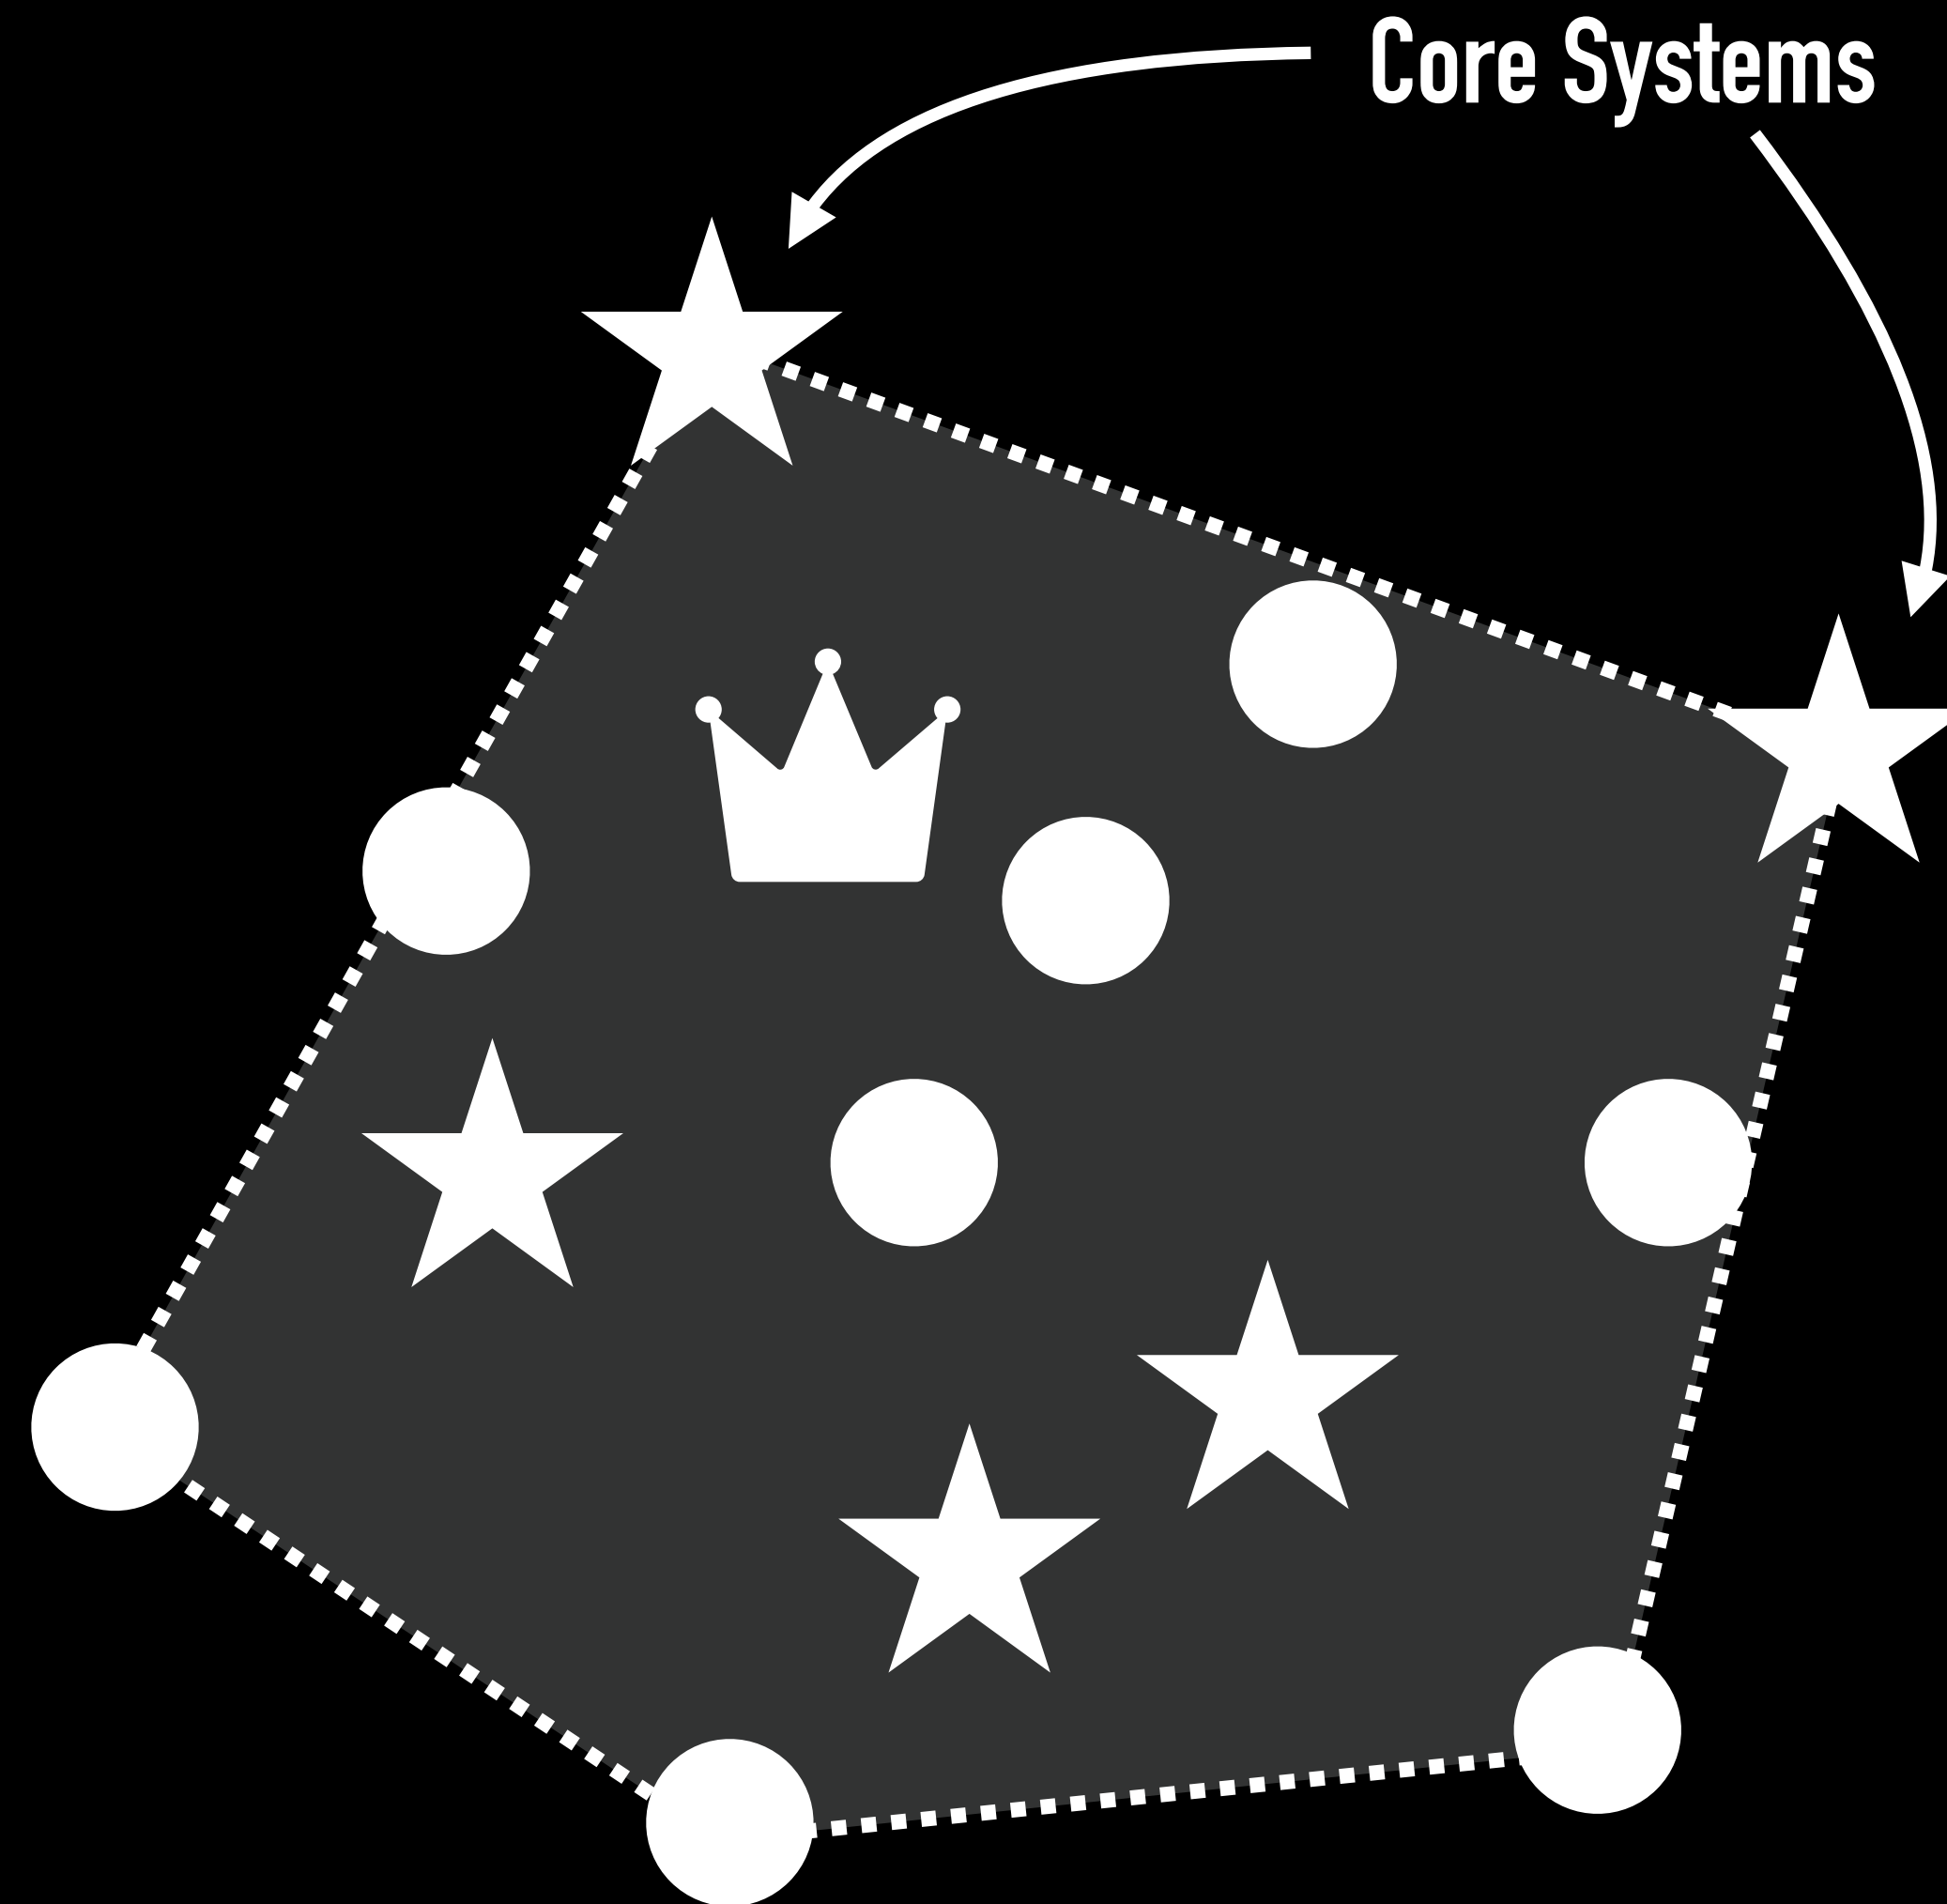

It's also the most important system in the Region as it is the only one with a **Local Market**.

-  King Star System
-  Core Star System
-  Star System

# Regions

Open to all

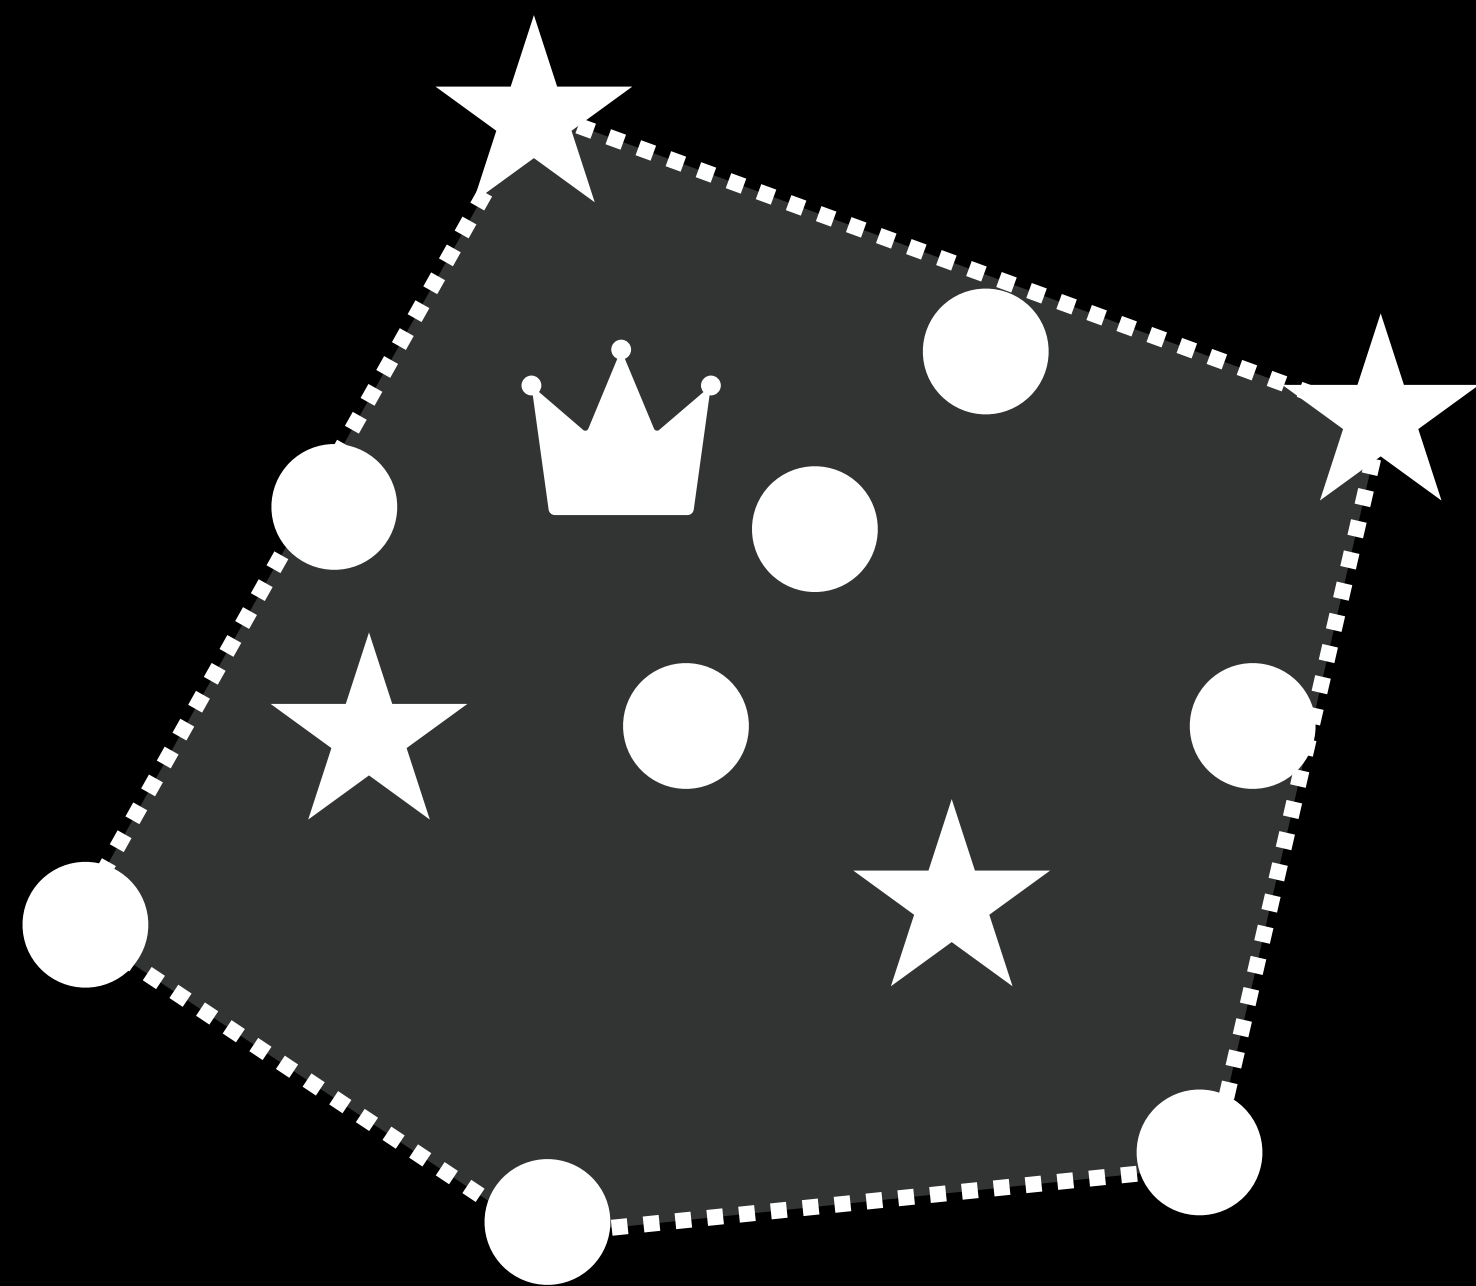

Each region consists of:

- 1 **King Star System**
- A small number of **Core Star Systems**
- Multiple normal **Star Systems**

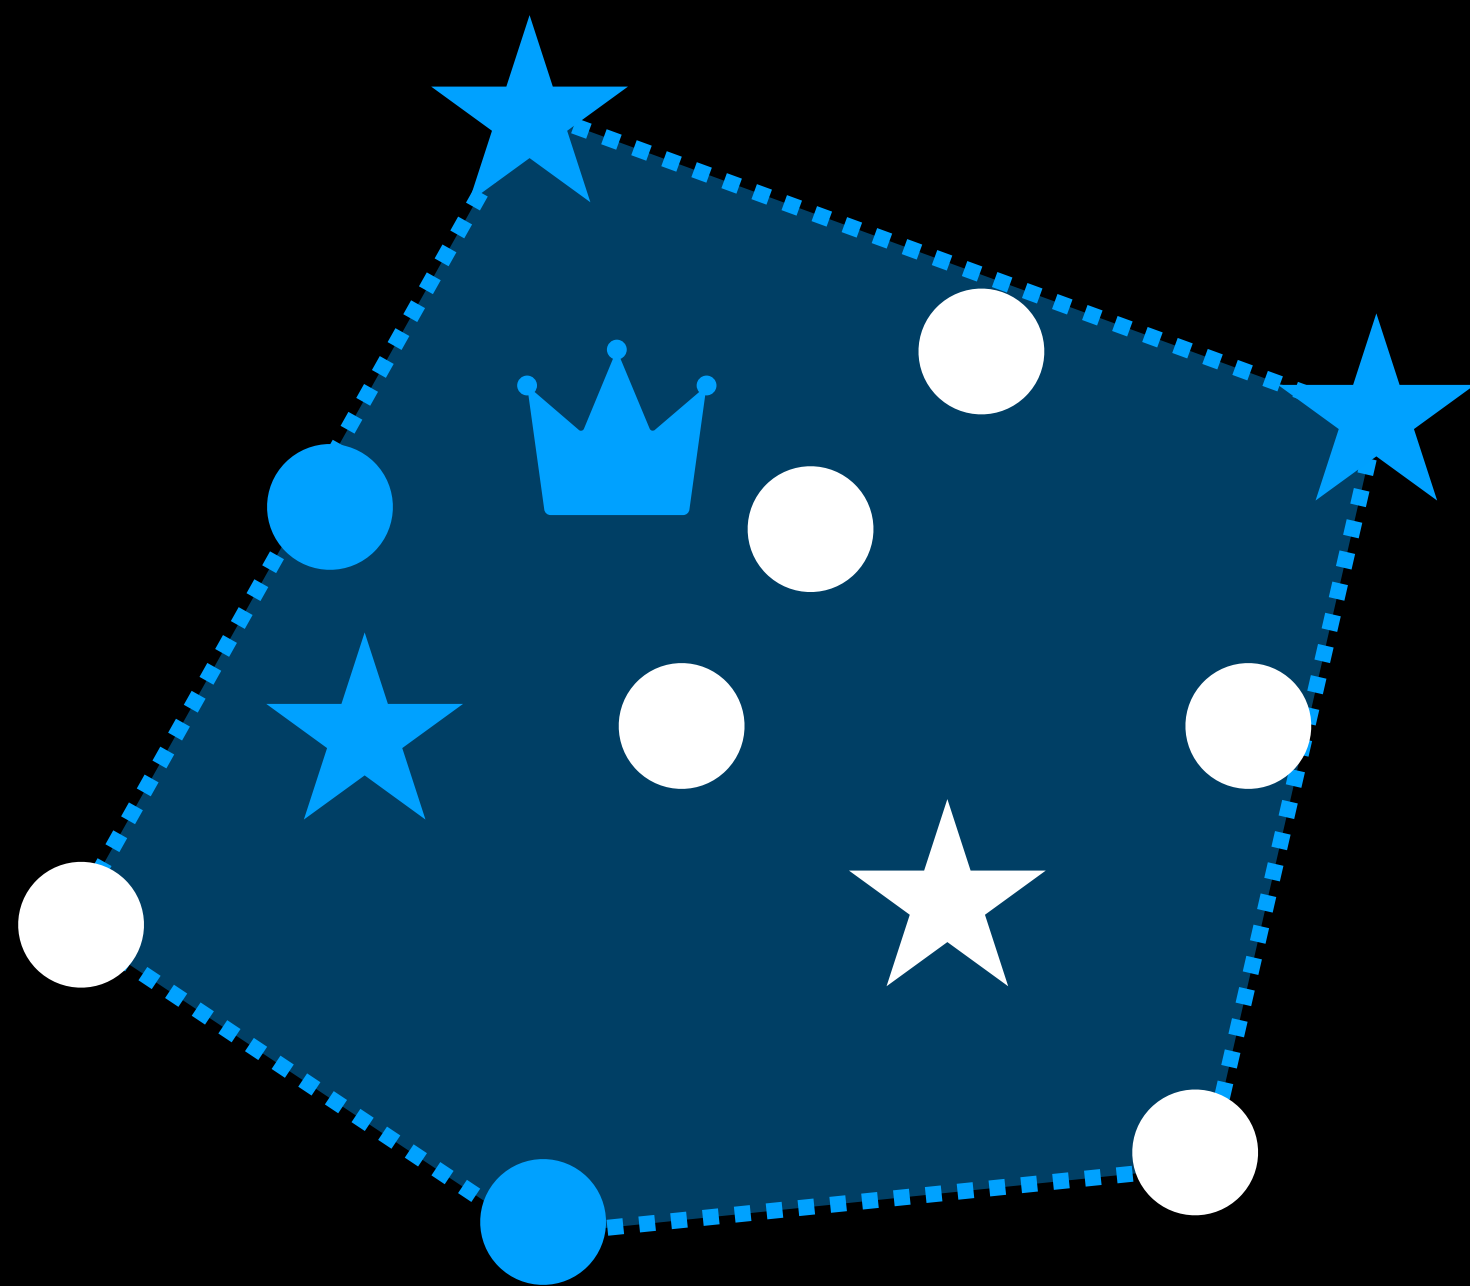

Beyond the existing systems that will become regions, C4 will start with 18 completely neutral regions.

# Region Types

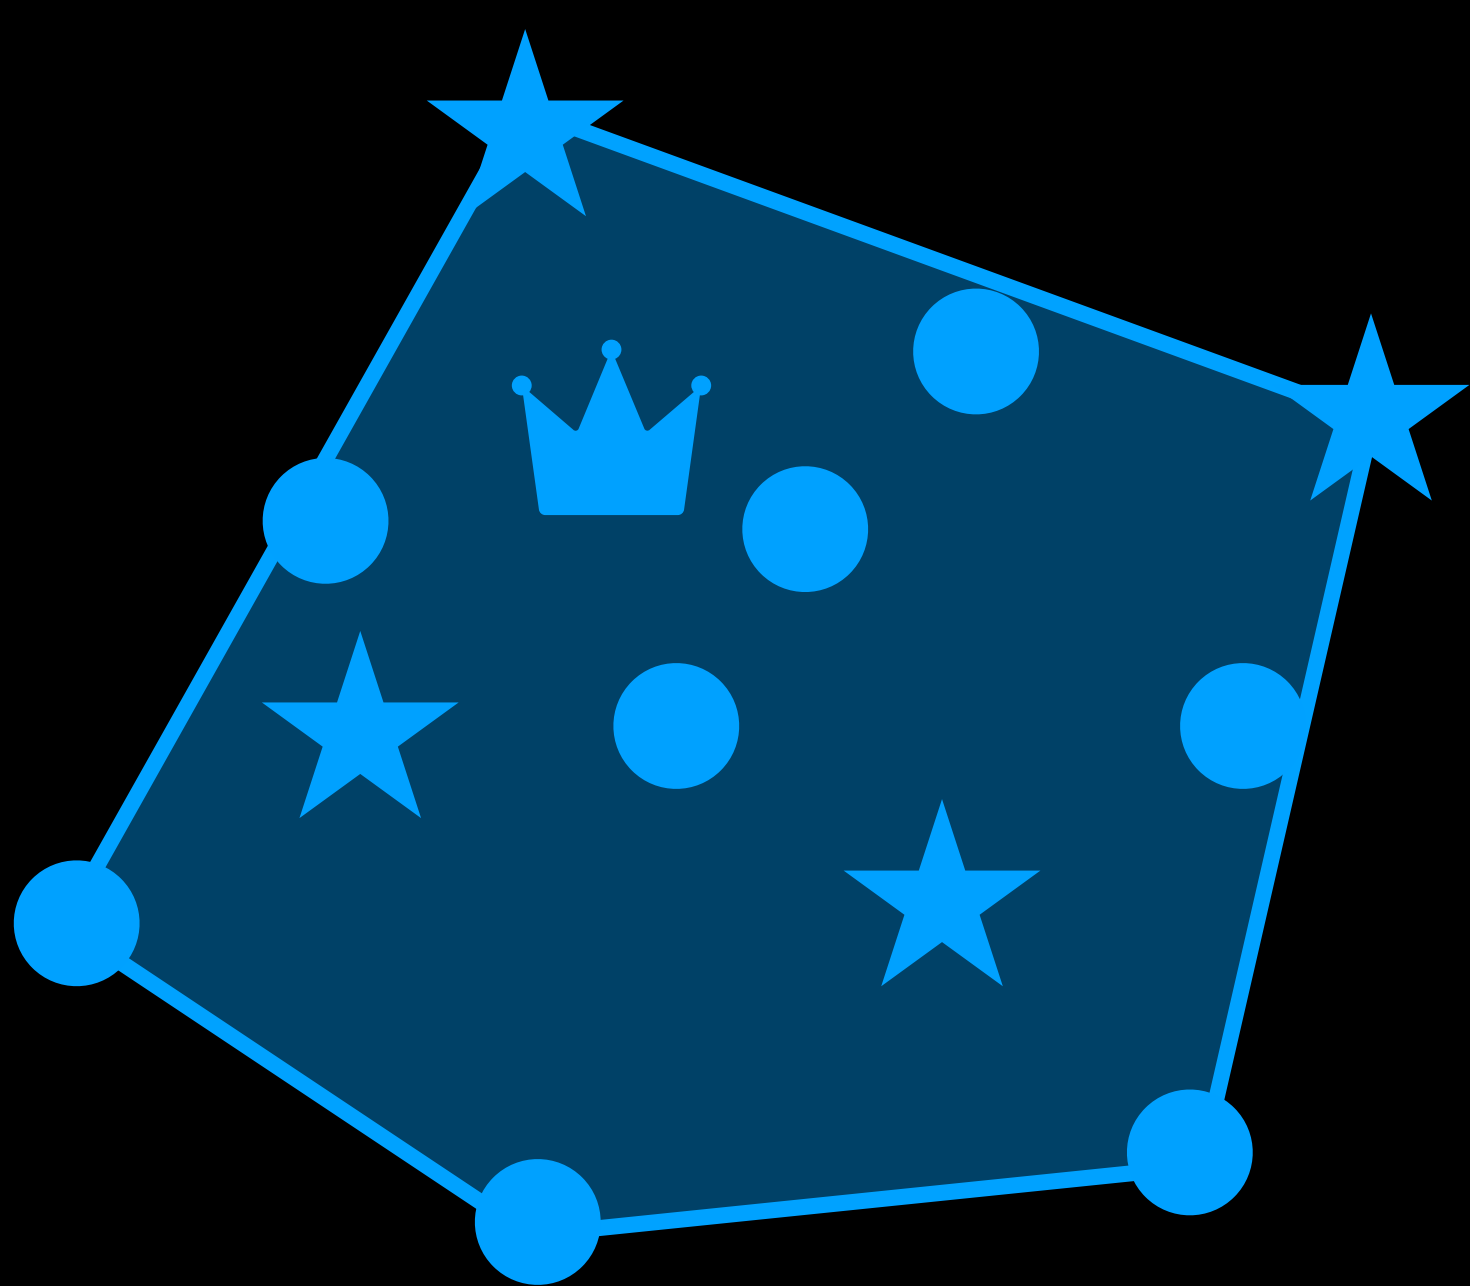

Neutral

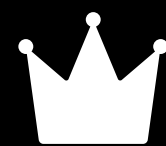

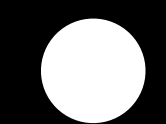

Border

Safe

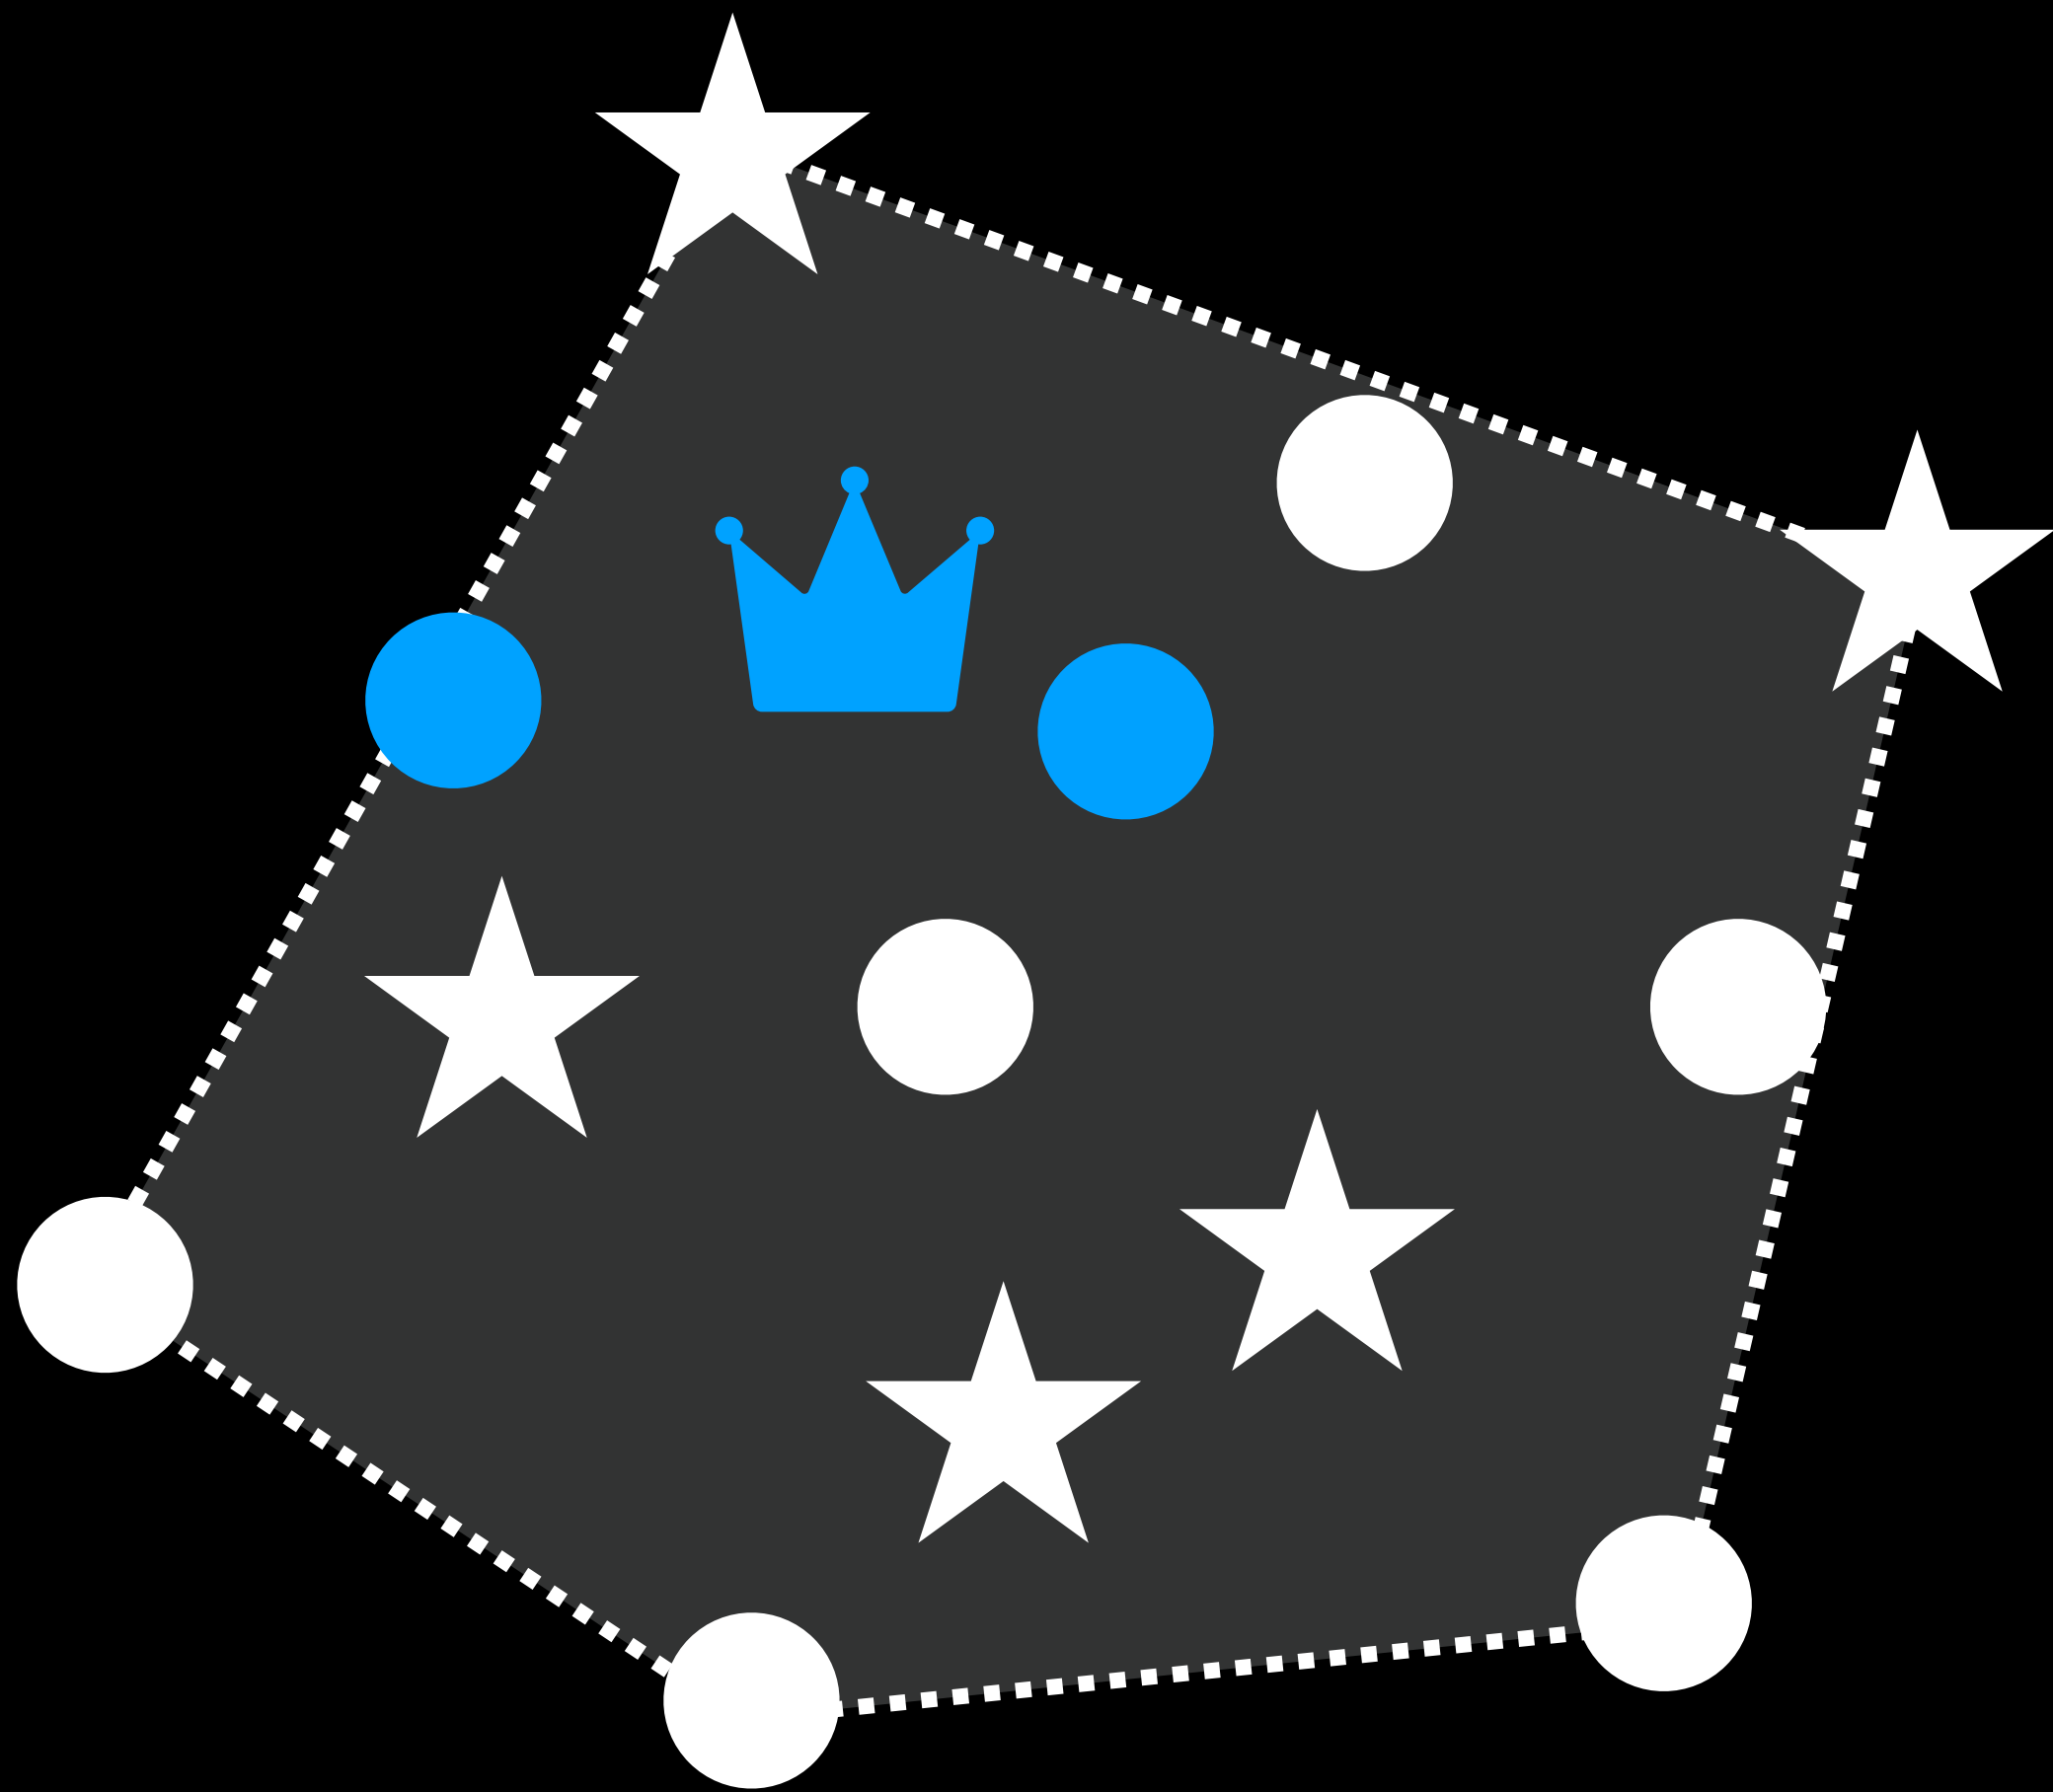

-  King Star System
-  Core Star System
-  Star System

We'll go deeper into these on the next slides.

# Neutral Region

Partially Conquered

-  King Star System
-  Core Star System
-  Star System

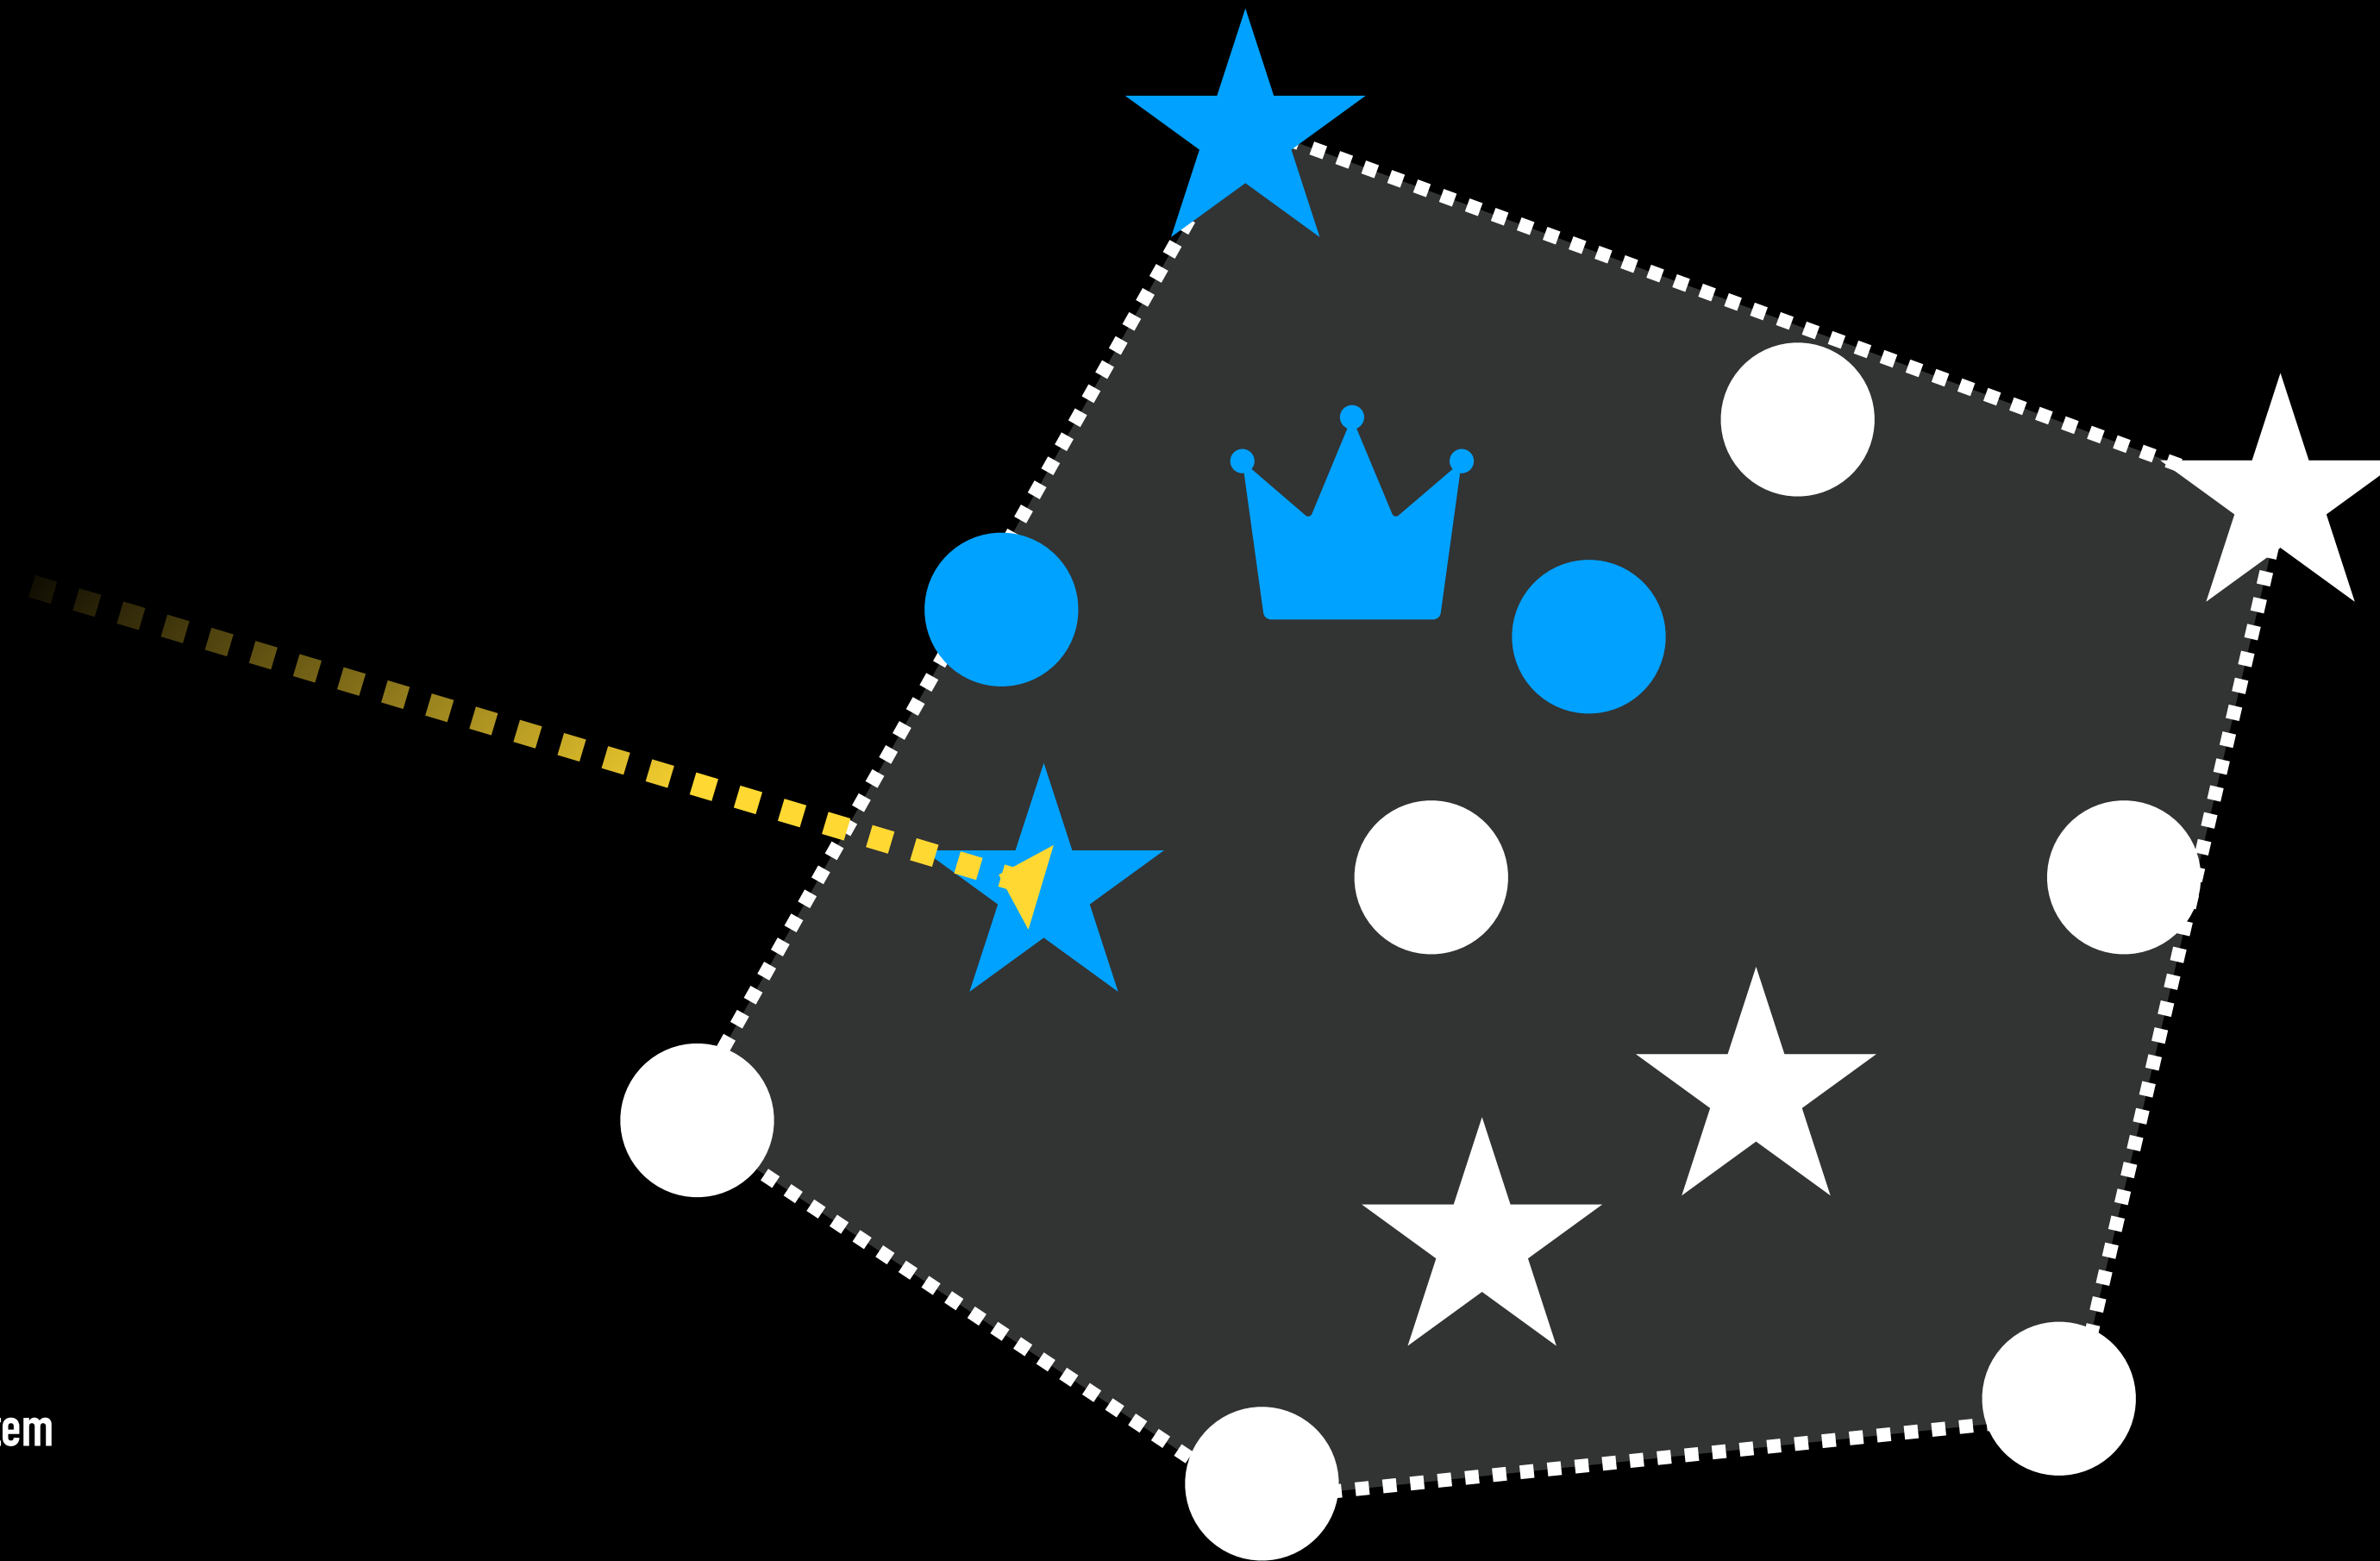

When you destroy a Tier 1 or Tier 0 Starbase, it becomes a Tier 0 Starbase that flips to your Faction.

Only by upgrading that **Starbase to Tier 1** will your faction gain ownership of the **Star System**.

# Warp Lanes

Are Enabled on a System Level

-  King Star System
-  Core Star System
-  Star System

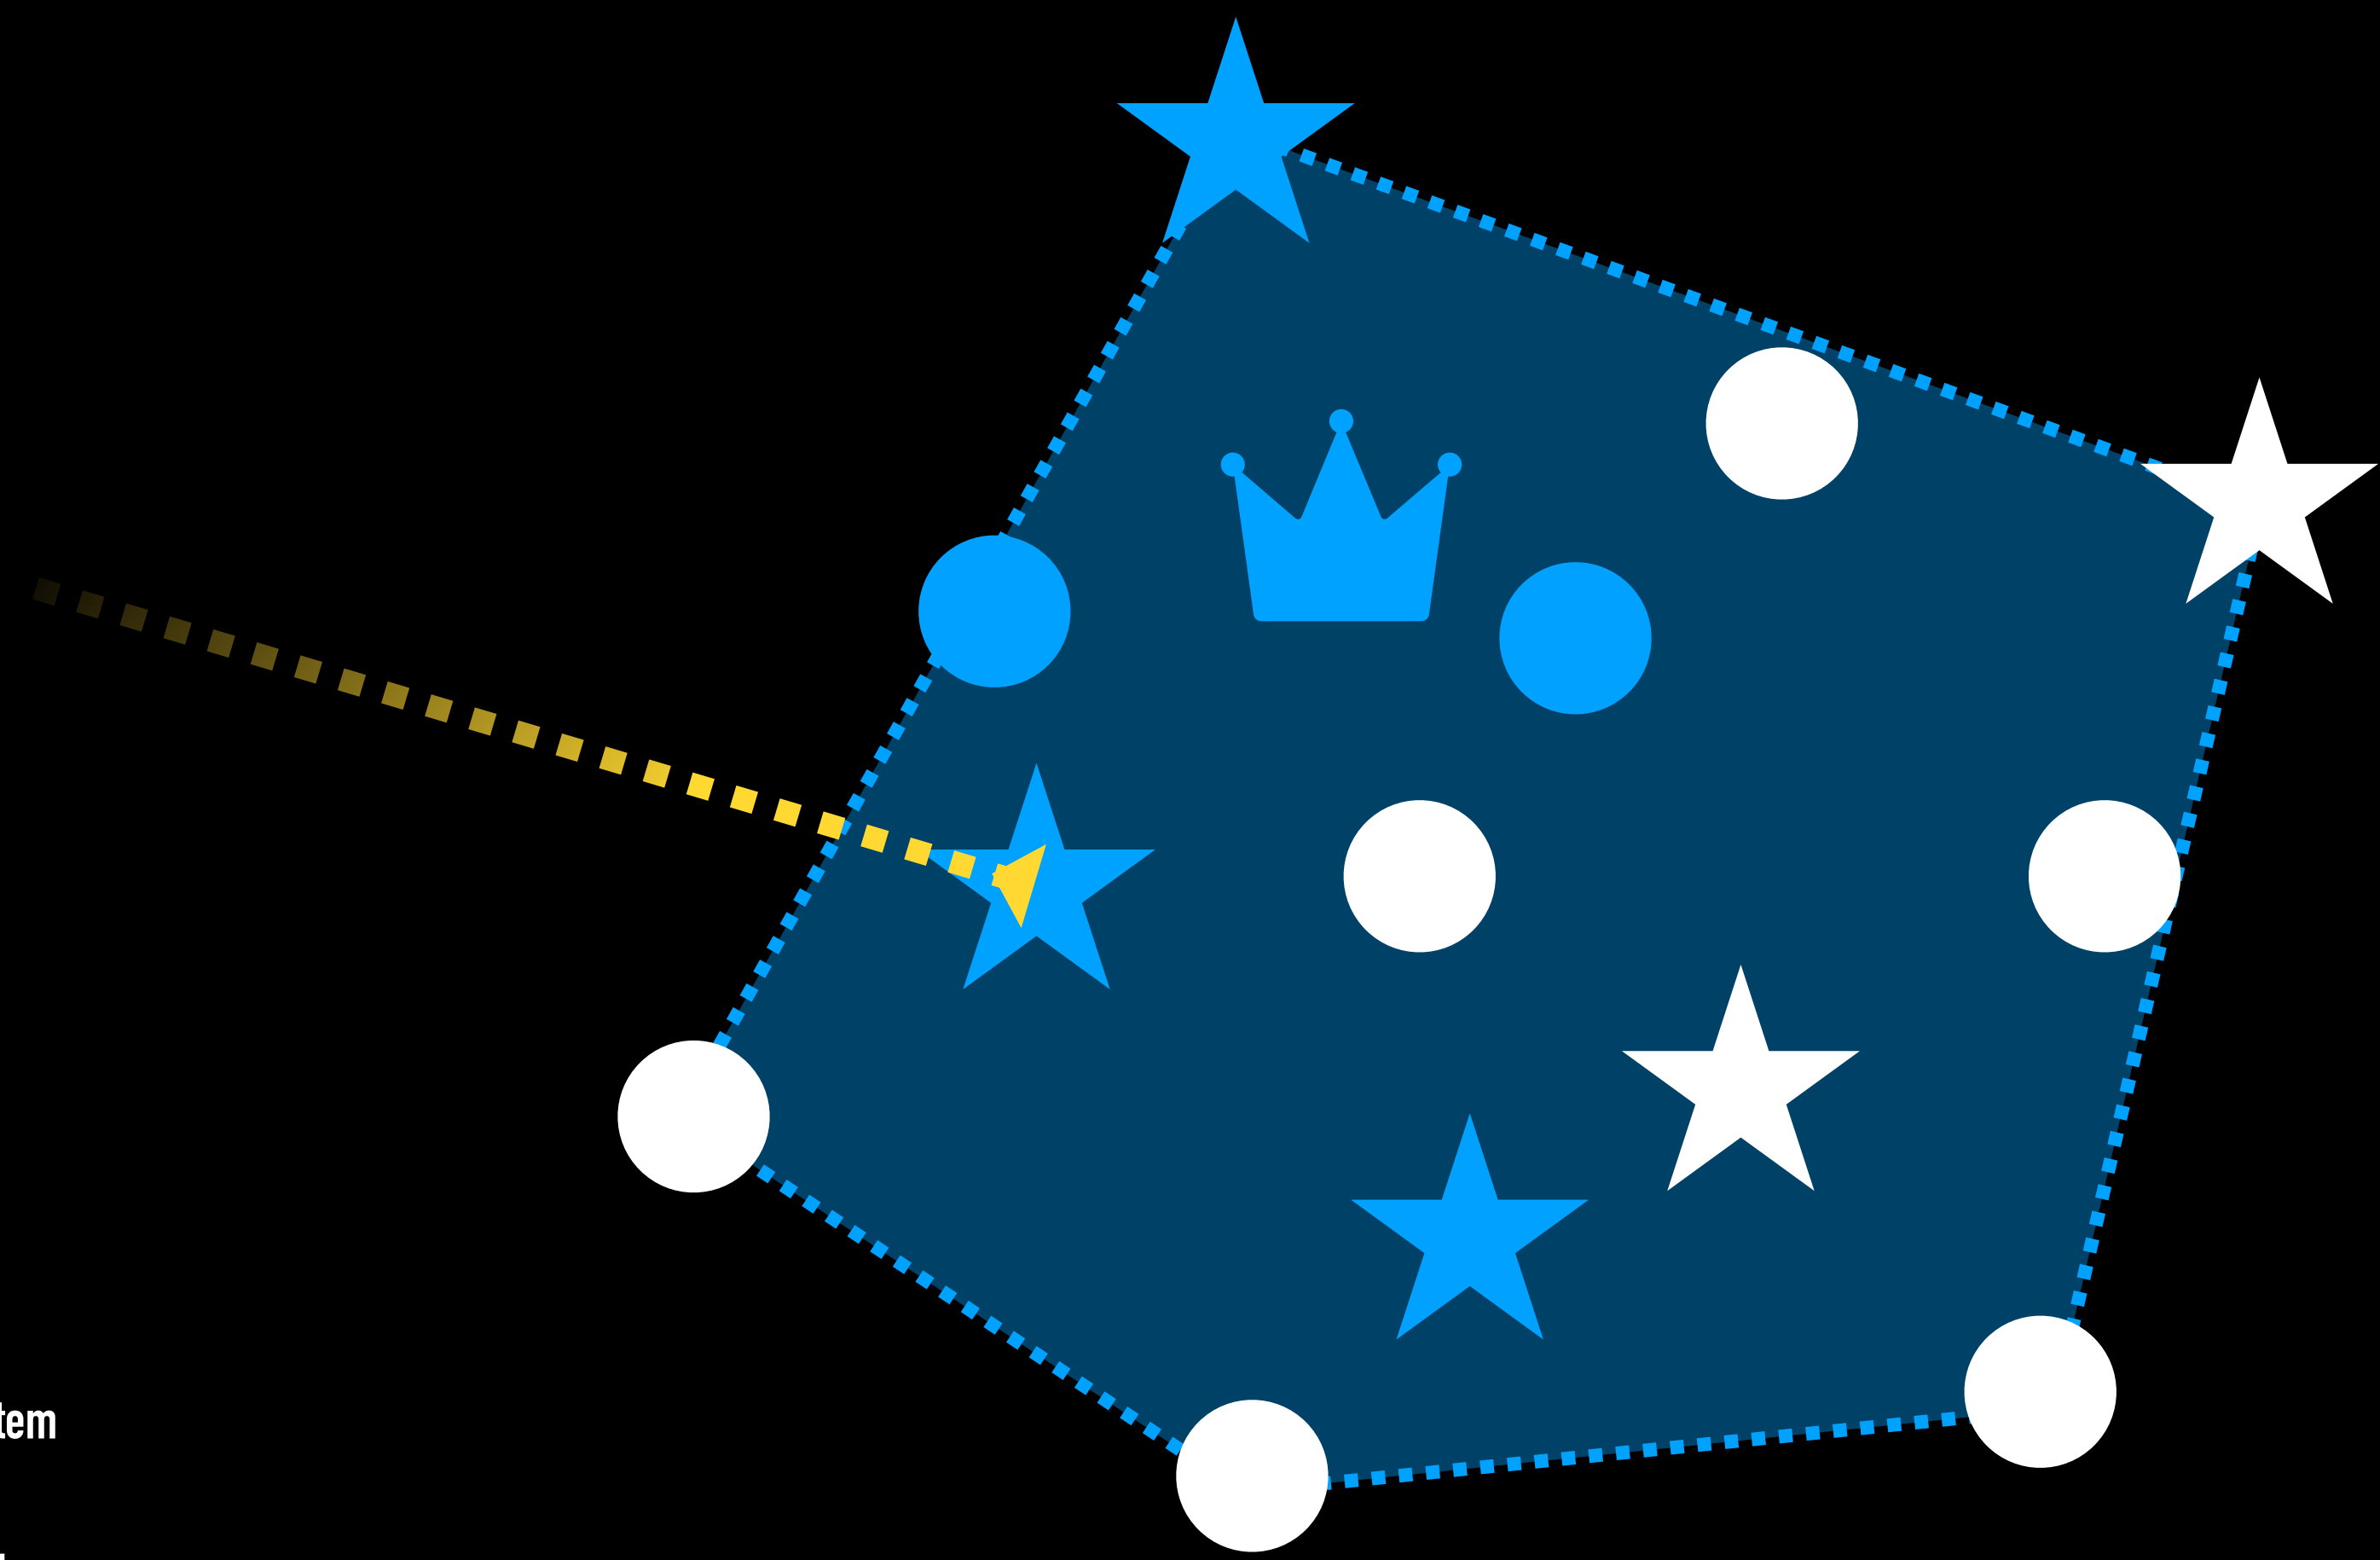

Conquering a **System** that is the endpoint for a Warp Lane may enable it, if your Faction owns the **System** on the other side as well.

This is the case no matter if the Regions are Neutral, Border, or Safe.

# Border Region

Partially Owned

-  King Star System
-  Core Star System
-  Star System

When a Faction conquers 60%+ of the Core Systems, including the King System, that Faction will **establish ownership of the Region.**

T5 Starbases in today's SAGE will reward ownership of all Core systems within their new regions, which means that these regions will be owned by the Faction from the start.

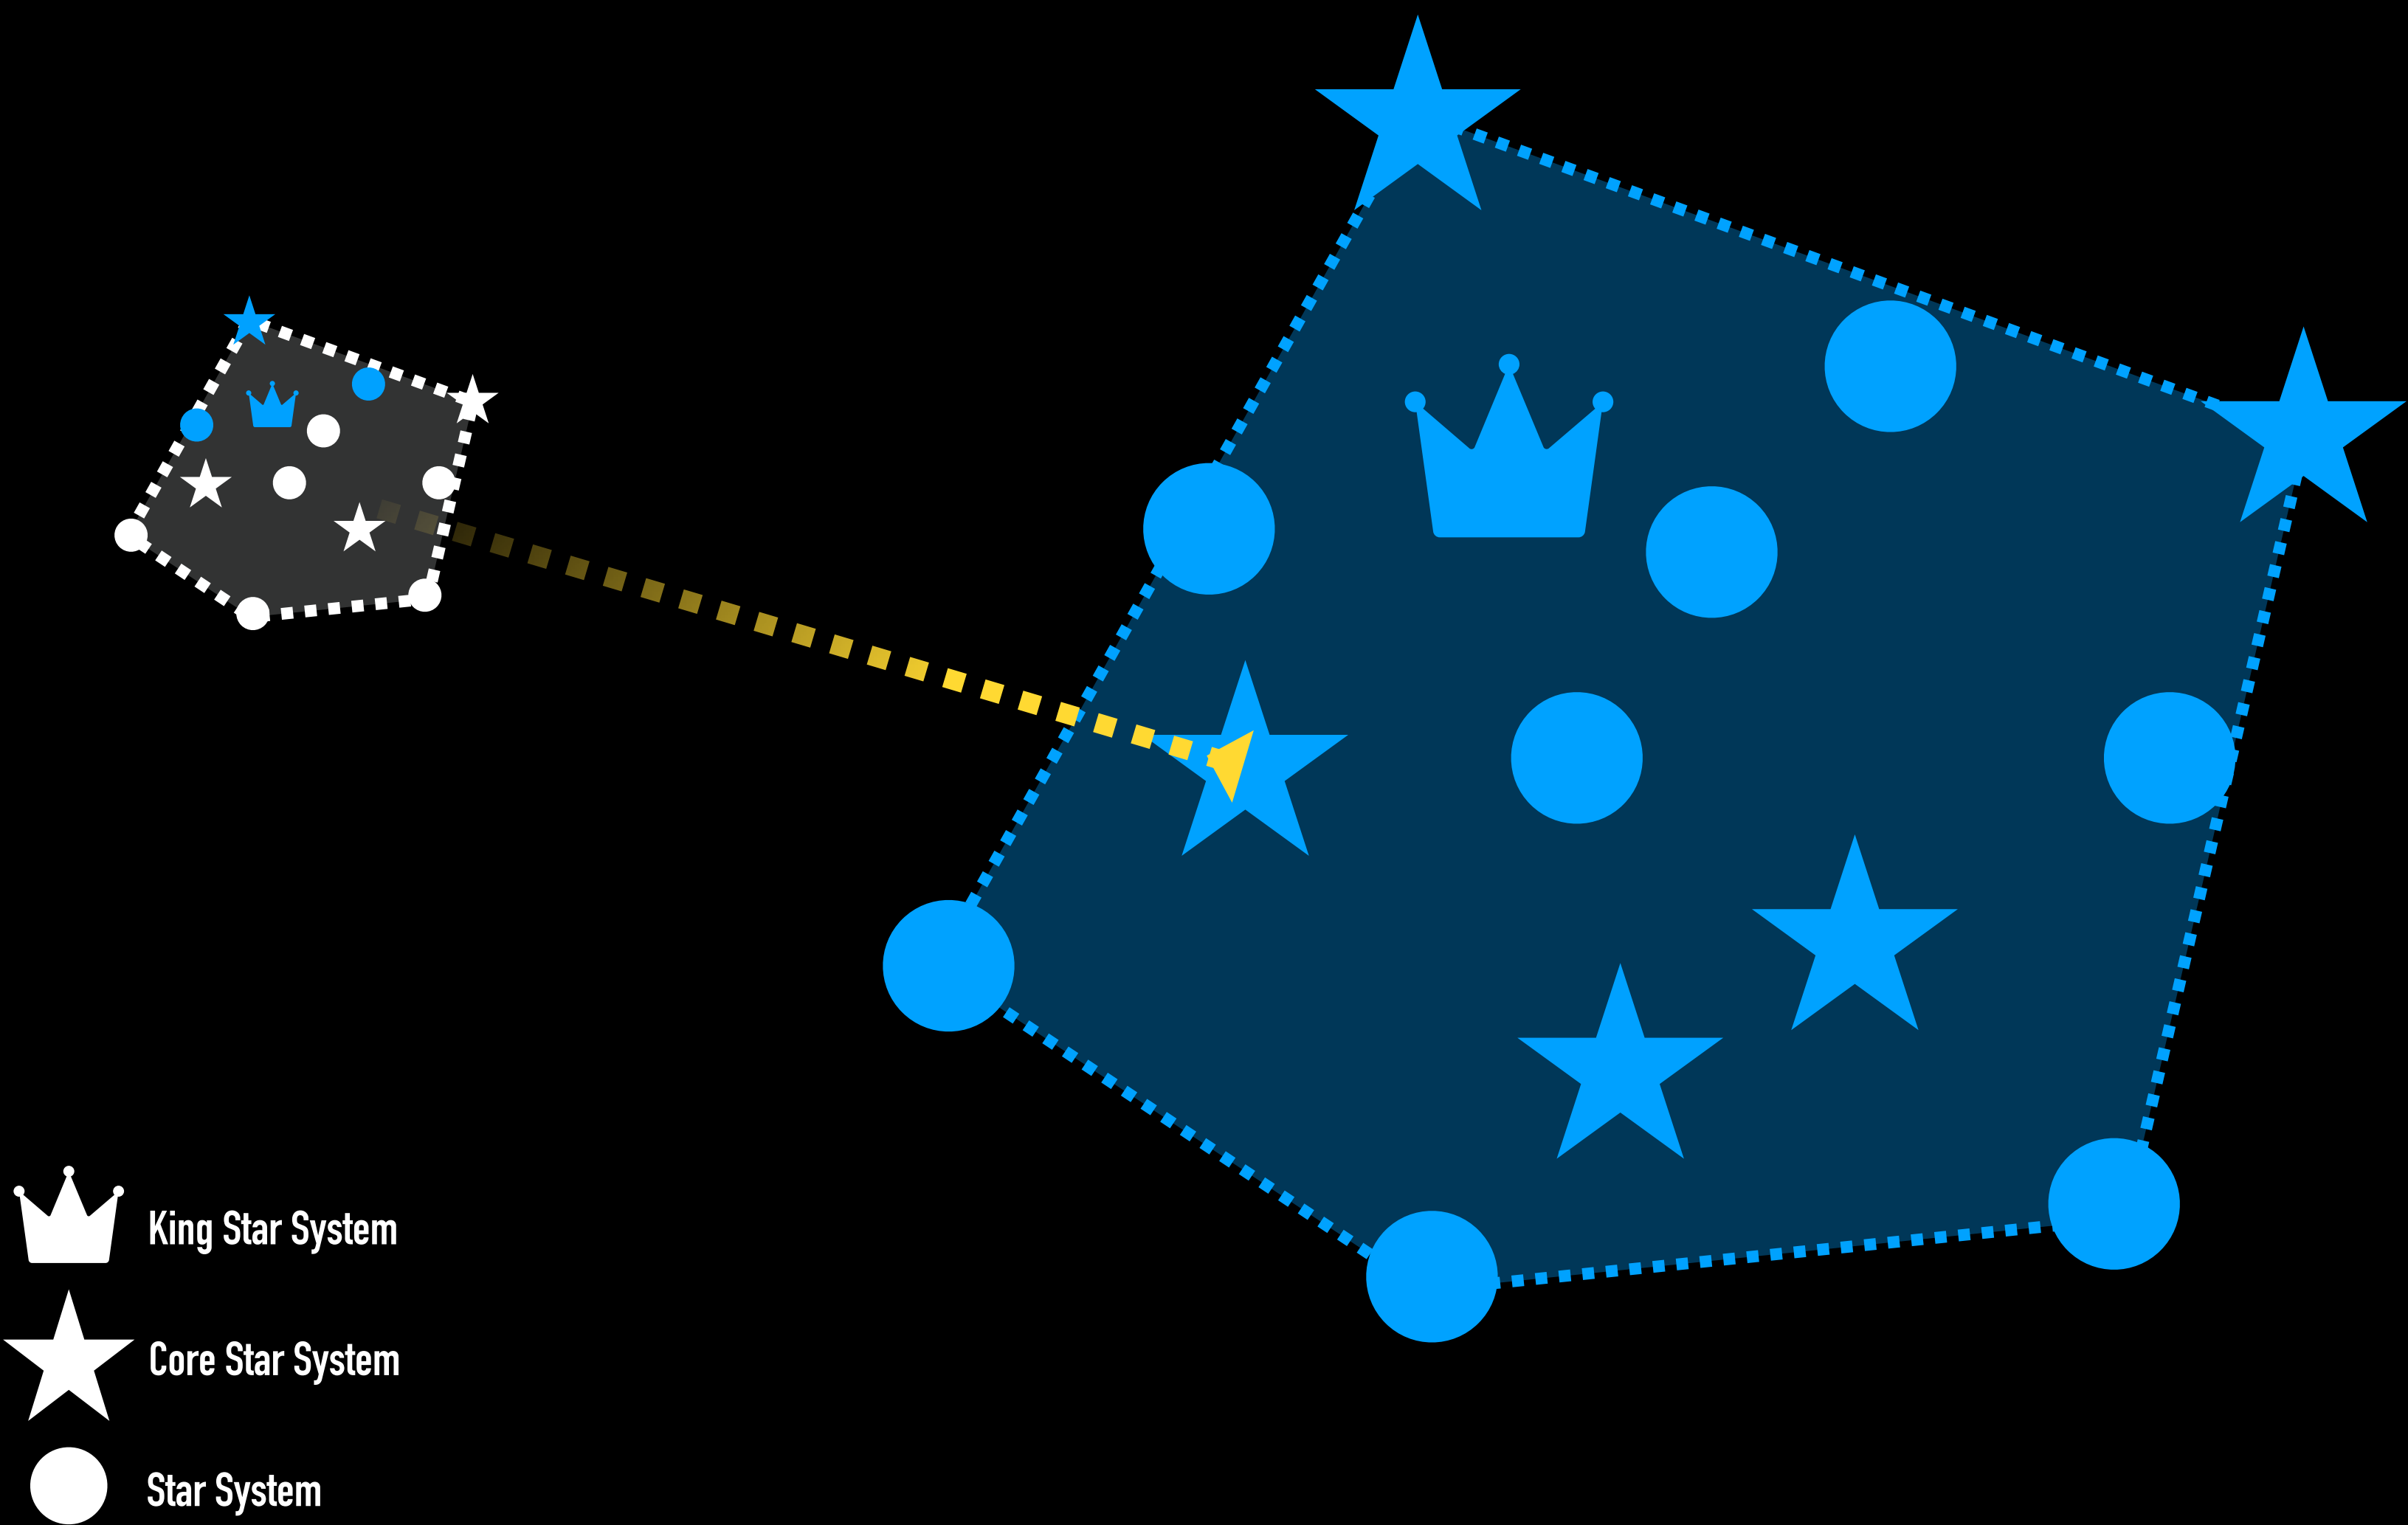

Owned (but not fully owned) Regions are always Border Regions.

# Border Region

Fully Owned

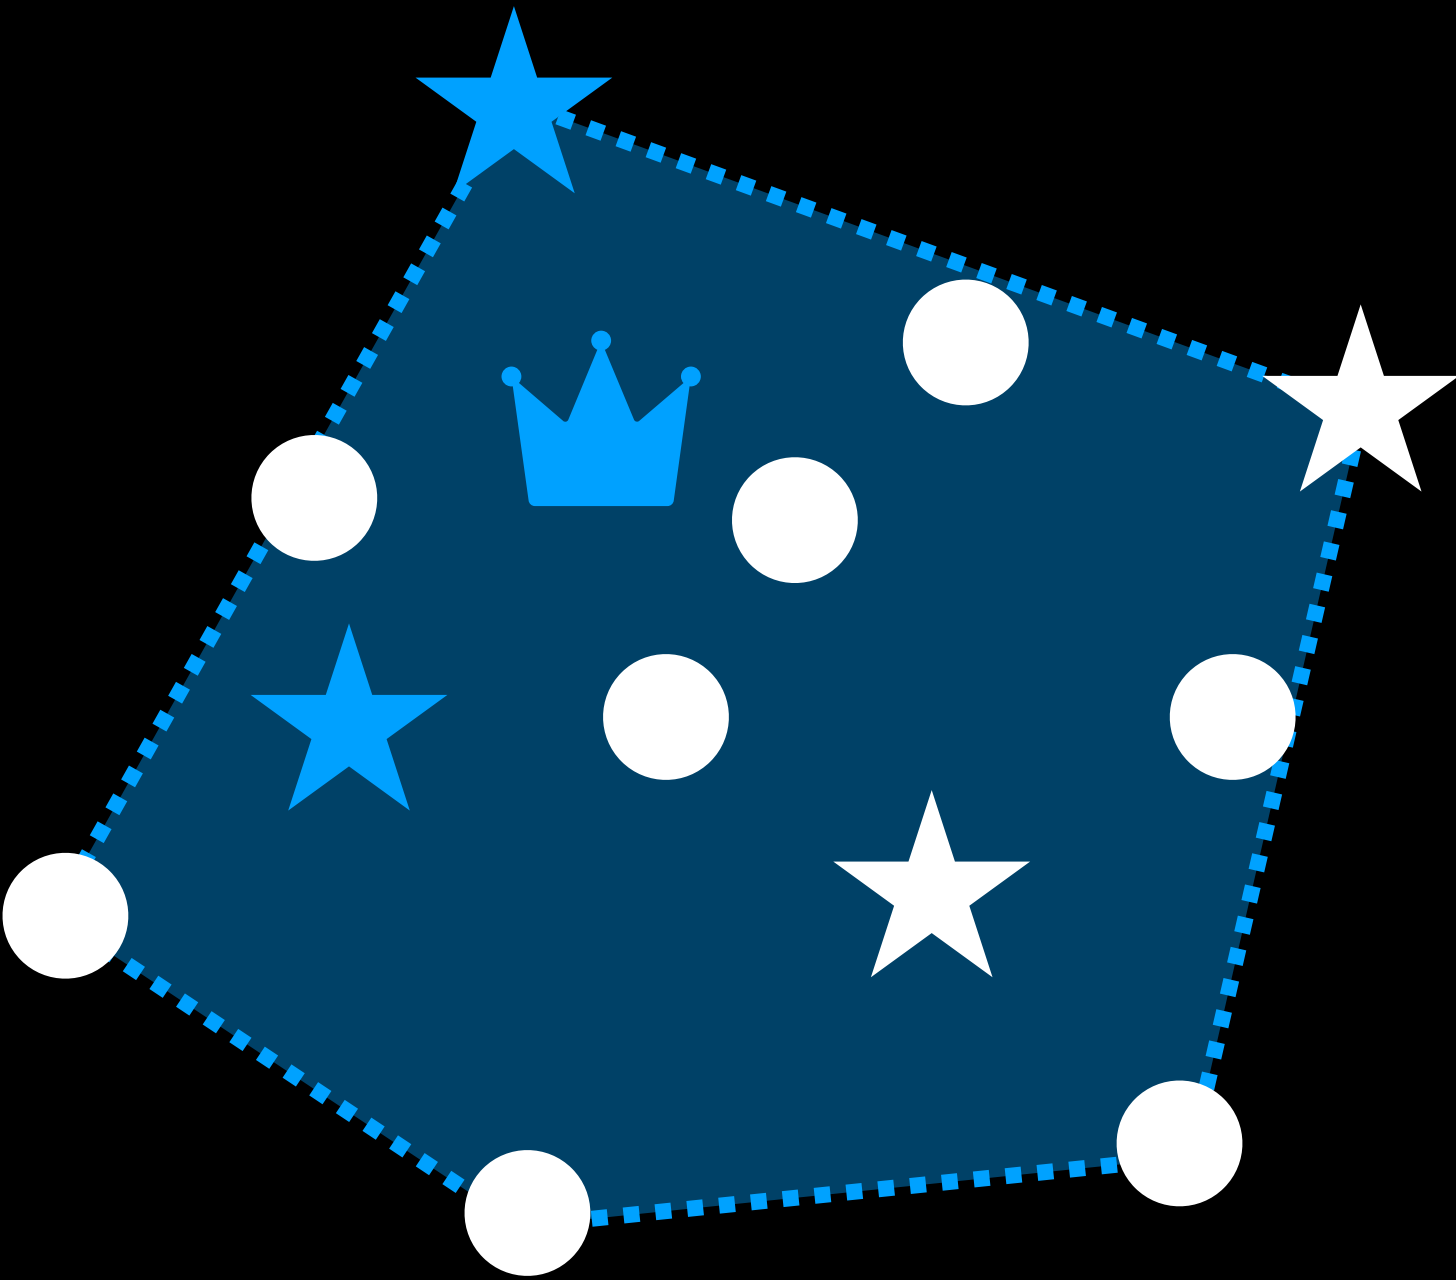

When all Star Systems within a Region are conquered by a single Faction, it is now a **Fully Owned Region**.

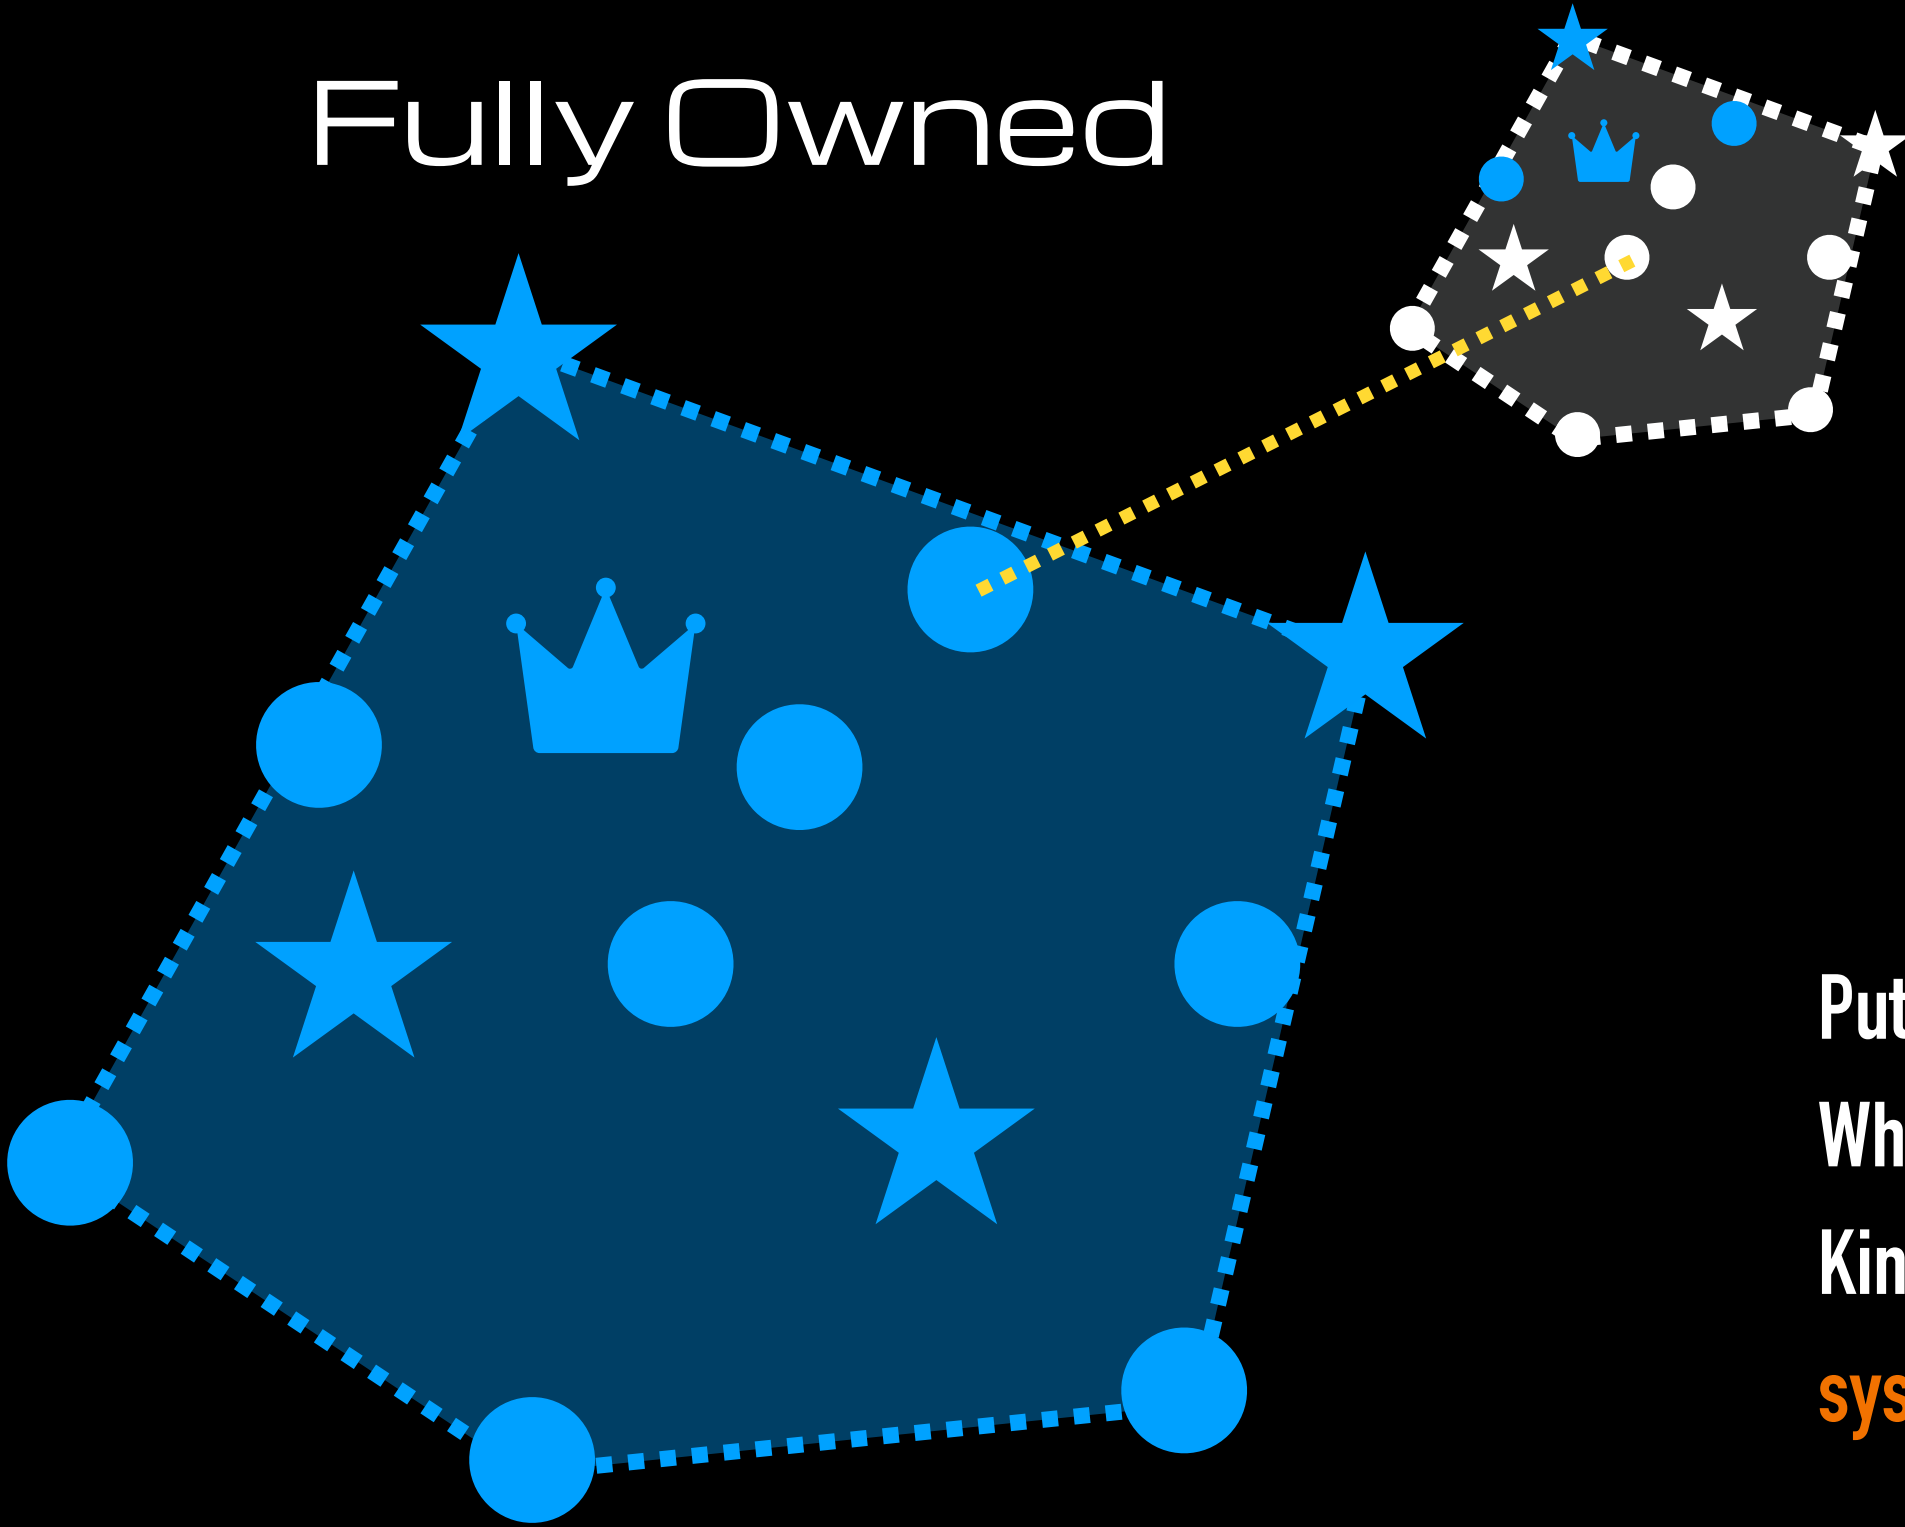

If all its outgoing Warp Lanes connect with other Safe/Border Regions of the same Faction, it is a **Safe Region**. If not, then it remains a **Border Region**.

# Border Regions

Partially Owned

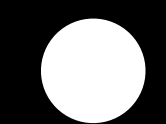

Fully Owned

Put differently:  
When a faction owns 60%+ of a region's King/Core systems, but **does not own ALL systems**, it is a Border Region.

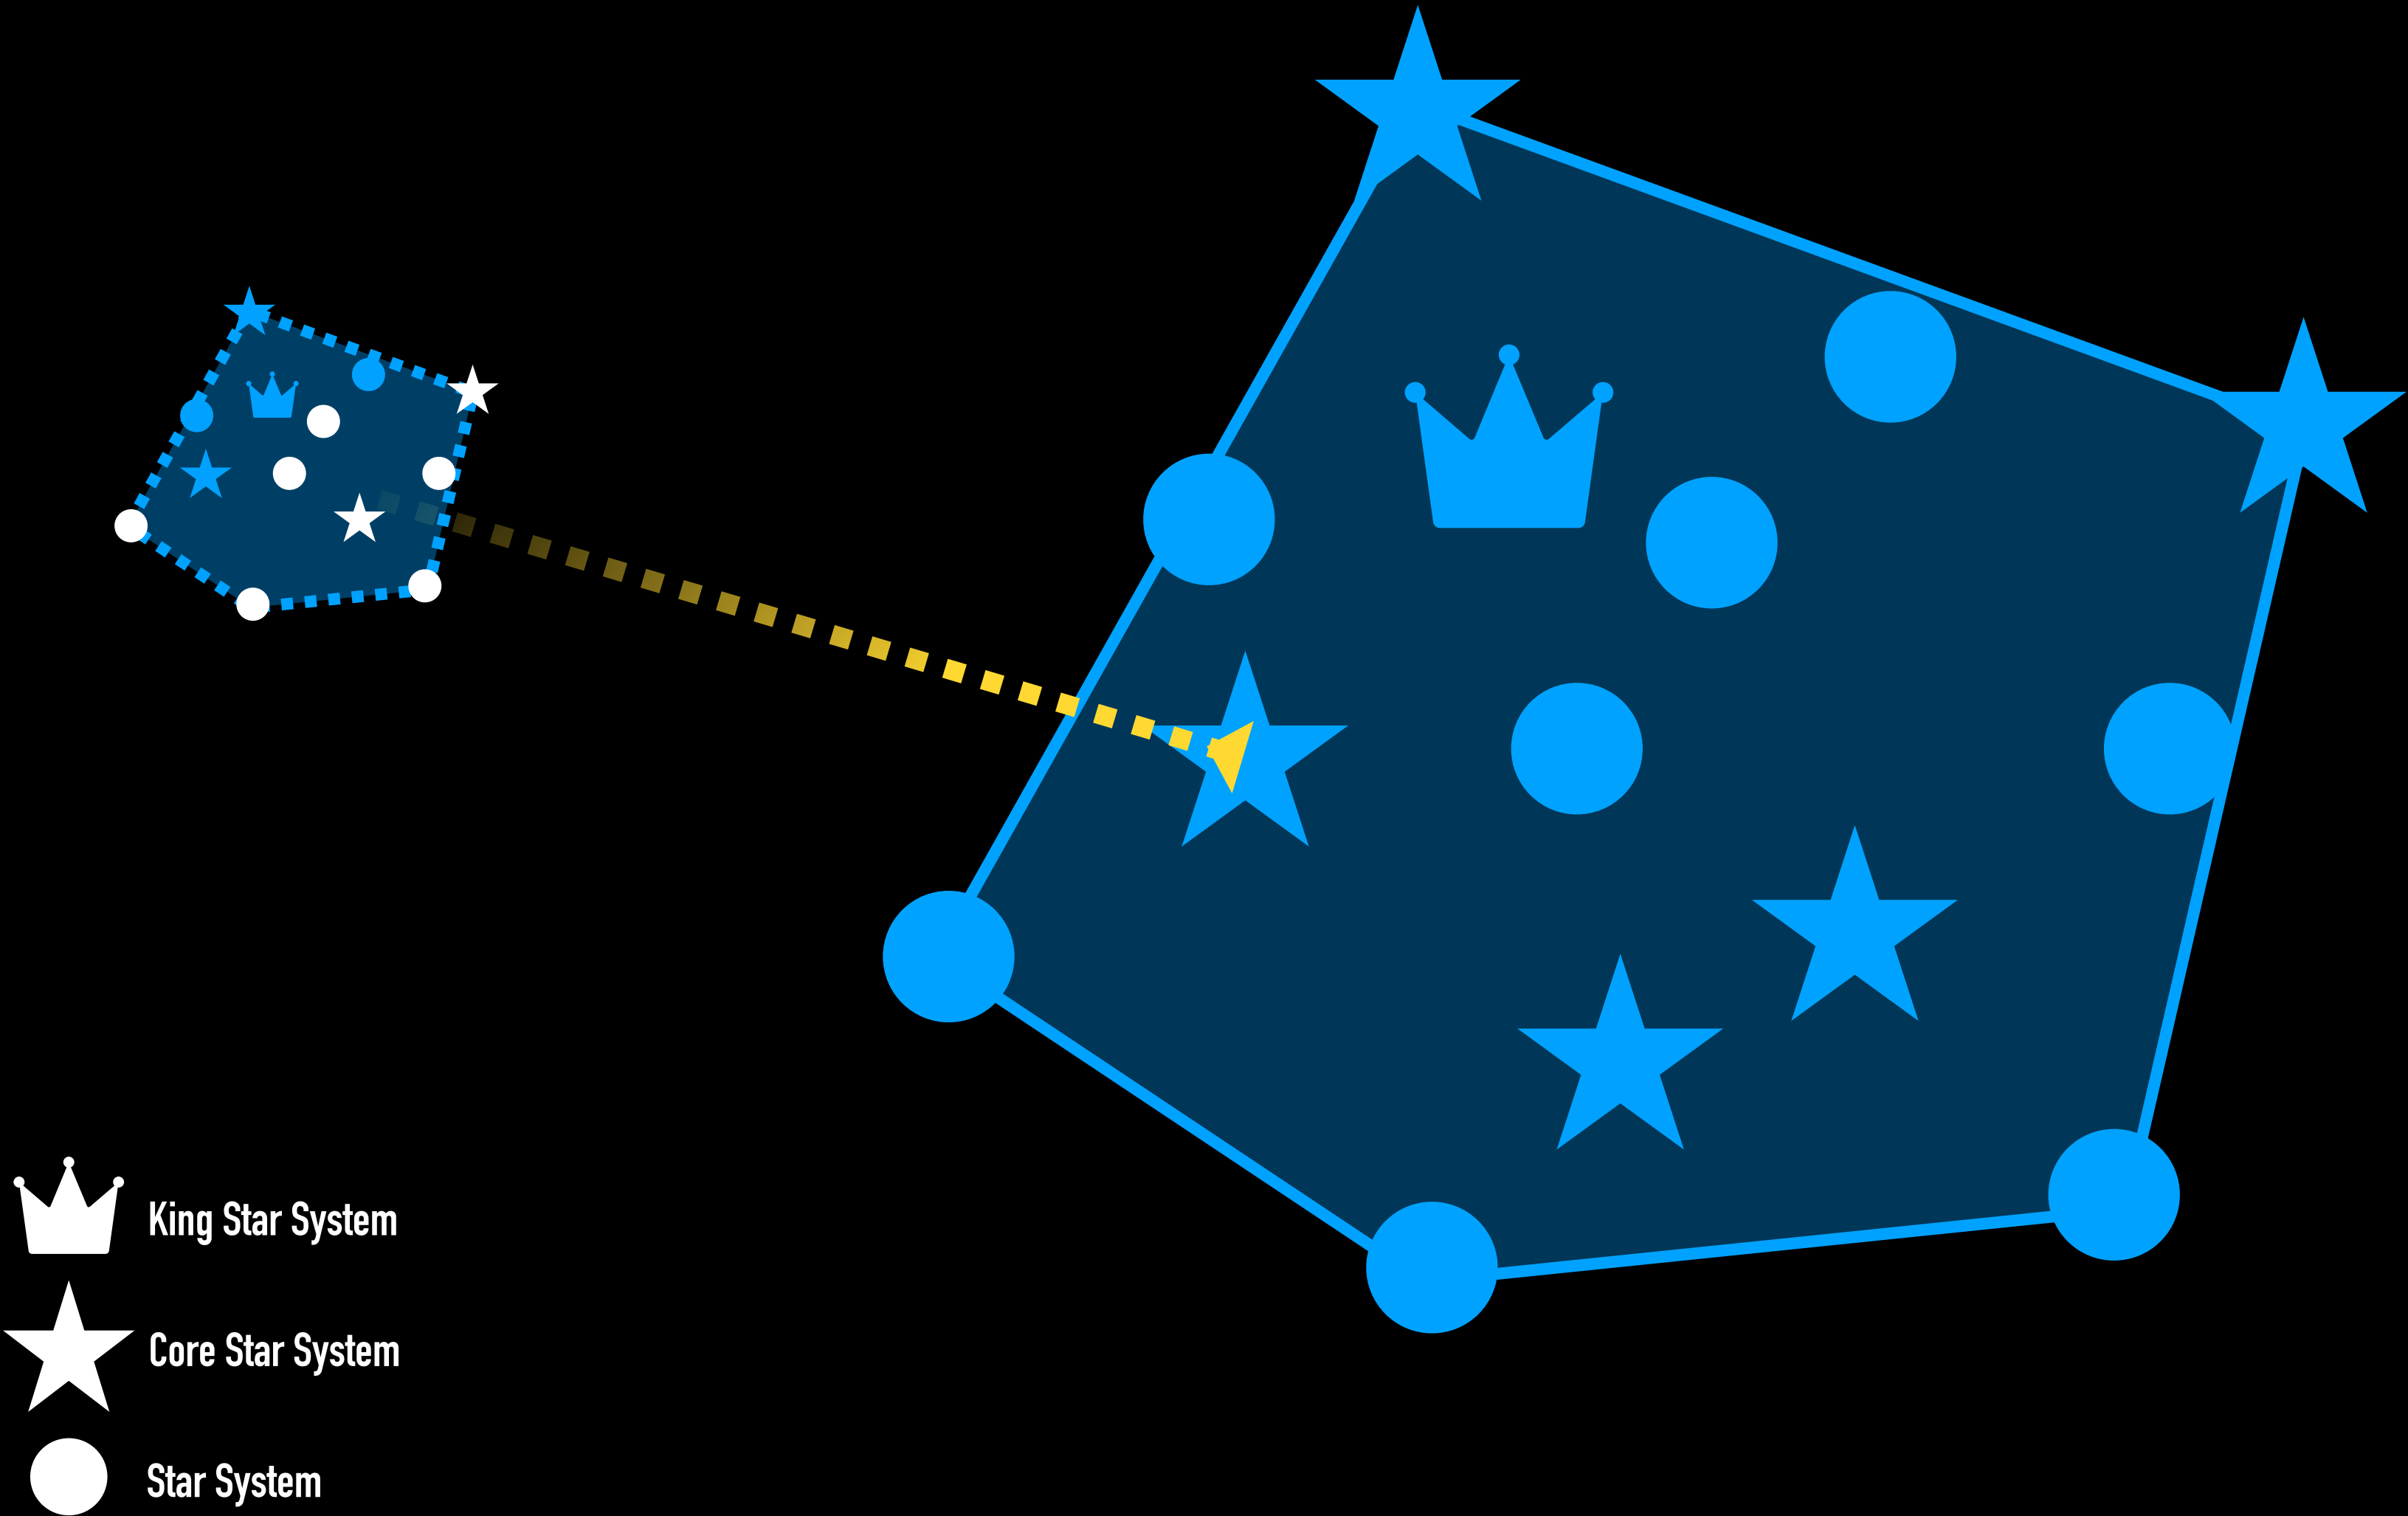

Alternatively, when a faction owns all systems within a region, but it **has a warp lane connecting it to a Neutral Region**, or a region owned by another faction, it is also a Border Region.

-  King Star System
-  Core Star System
-  Star System

# Safe Region

Fully Owned Region

When all outgoing warp lanes connect to Safe or Border Regions, a Region is Safe.

While a Border Region can still be invaded and attacked, a **Safe Region can not be entered or attacked by another Faction's forces.**

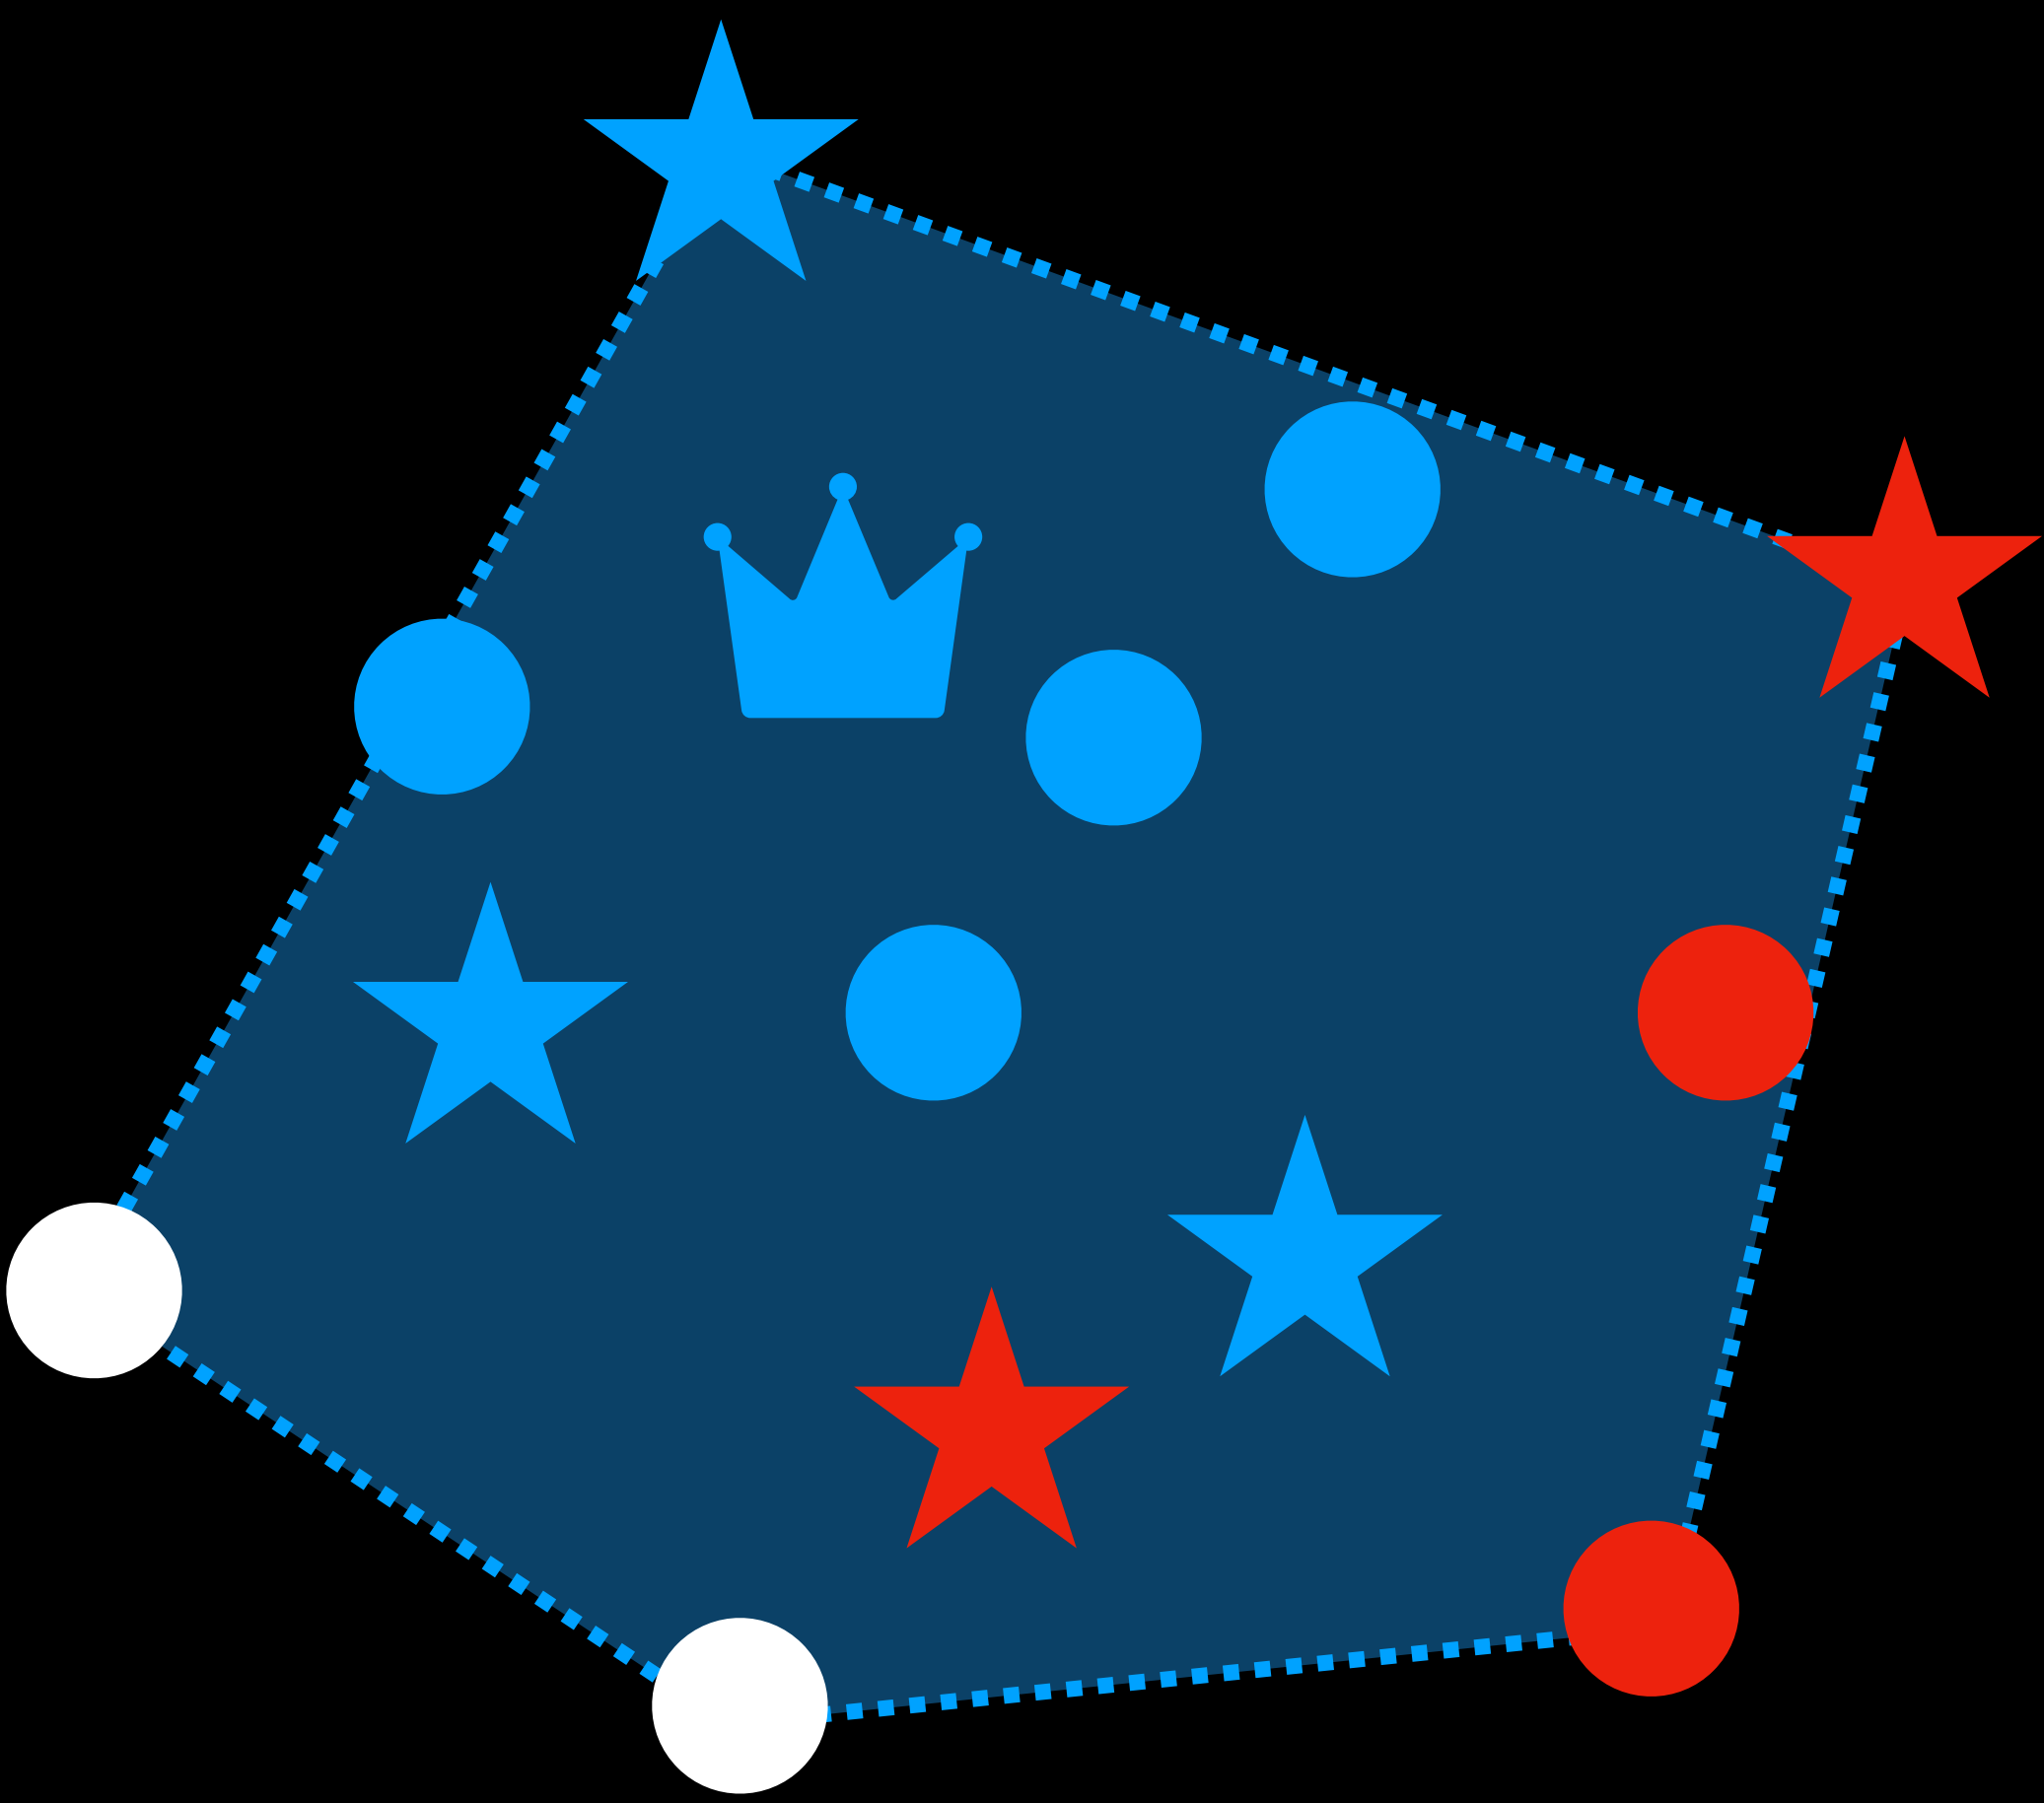

The 5 Regions in each Faction's Safe Zone will be **Fully Owned Regions** at the start of C4. They will always be Safe Regions, no matter the status of their neighbors in the Medium Risk Zone.

# Border Region

Contested

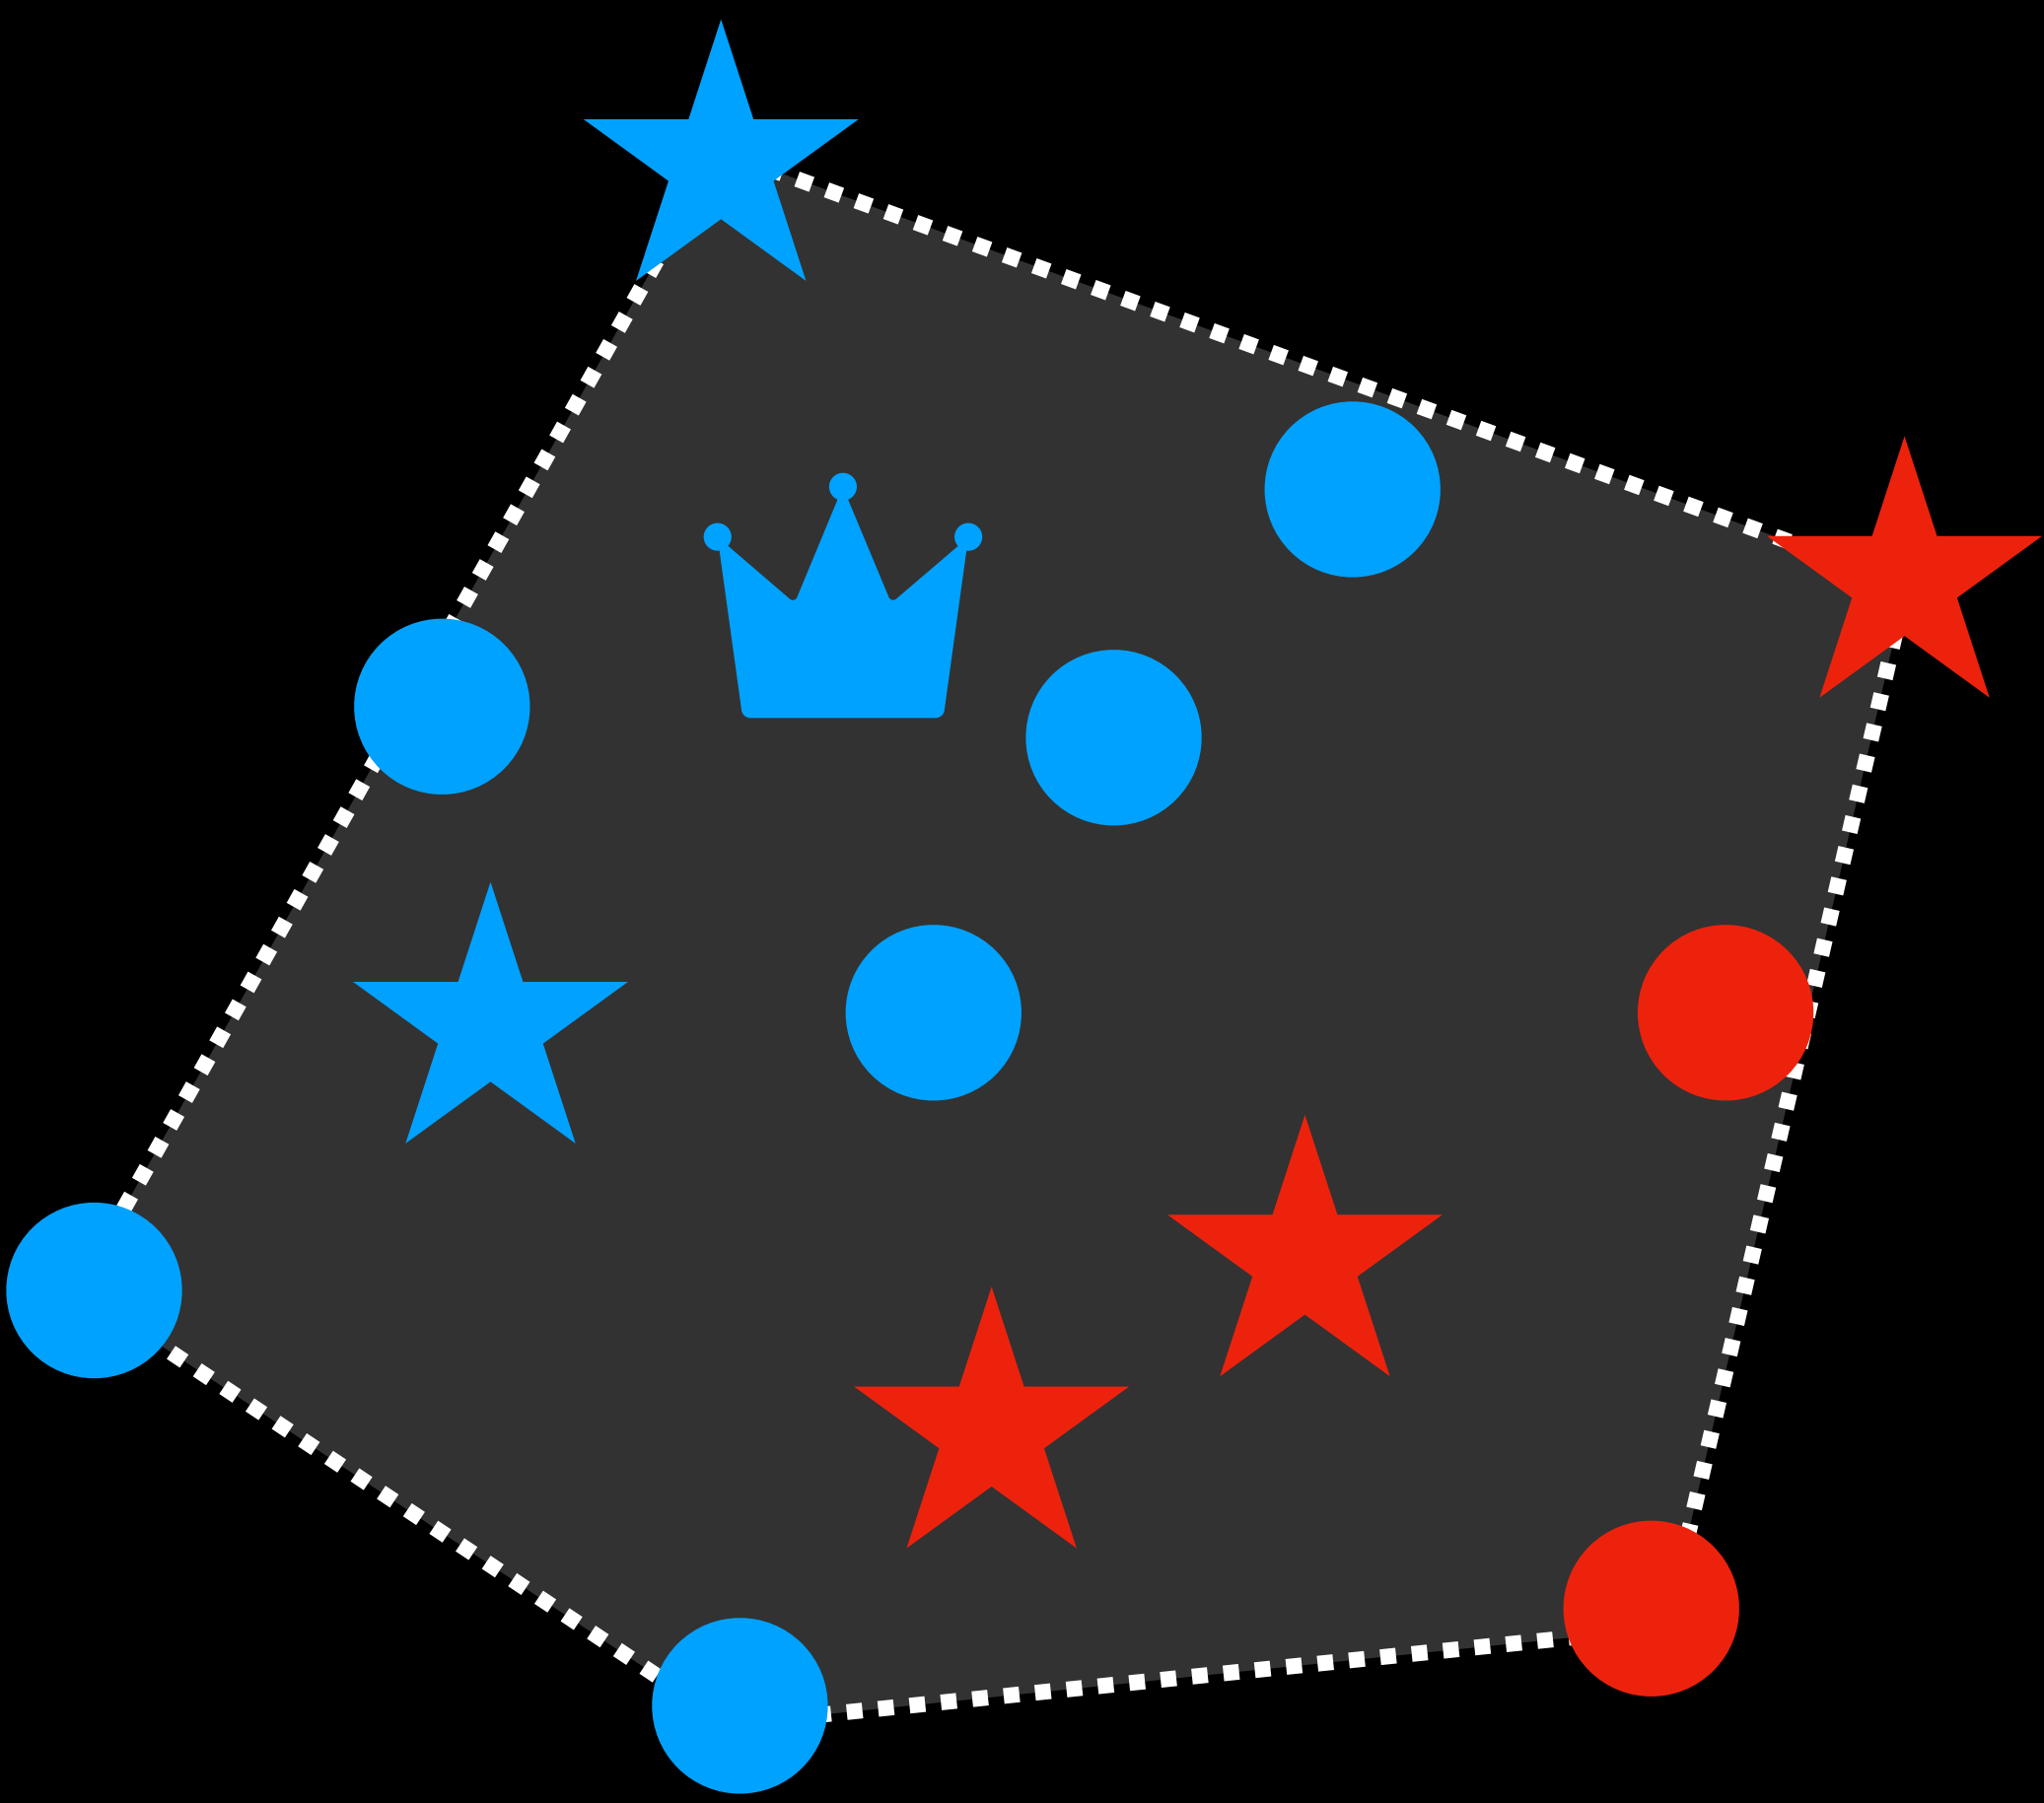

Other Factions can invade systems in  
**ANY** Region that is not a Safe Region.

-  King Star System
-  Core Star System
-  Star System

# Neutral Region

Contested

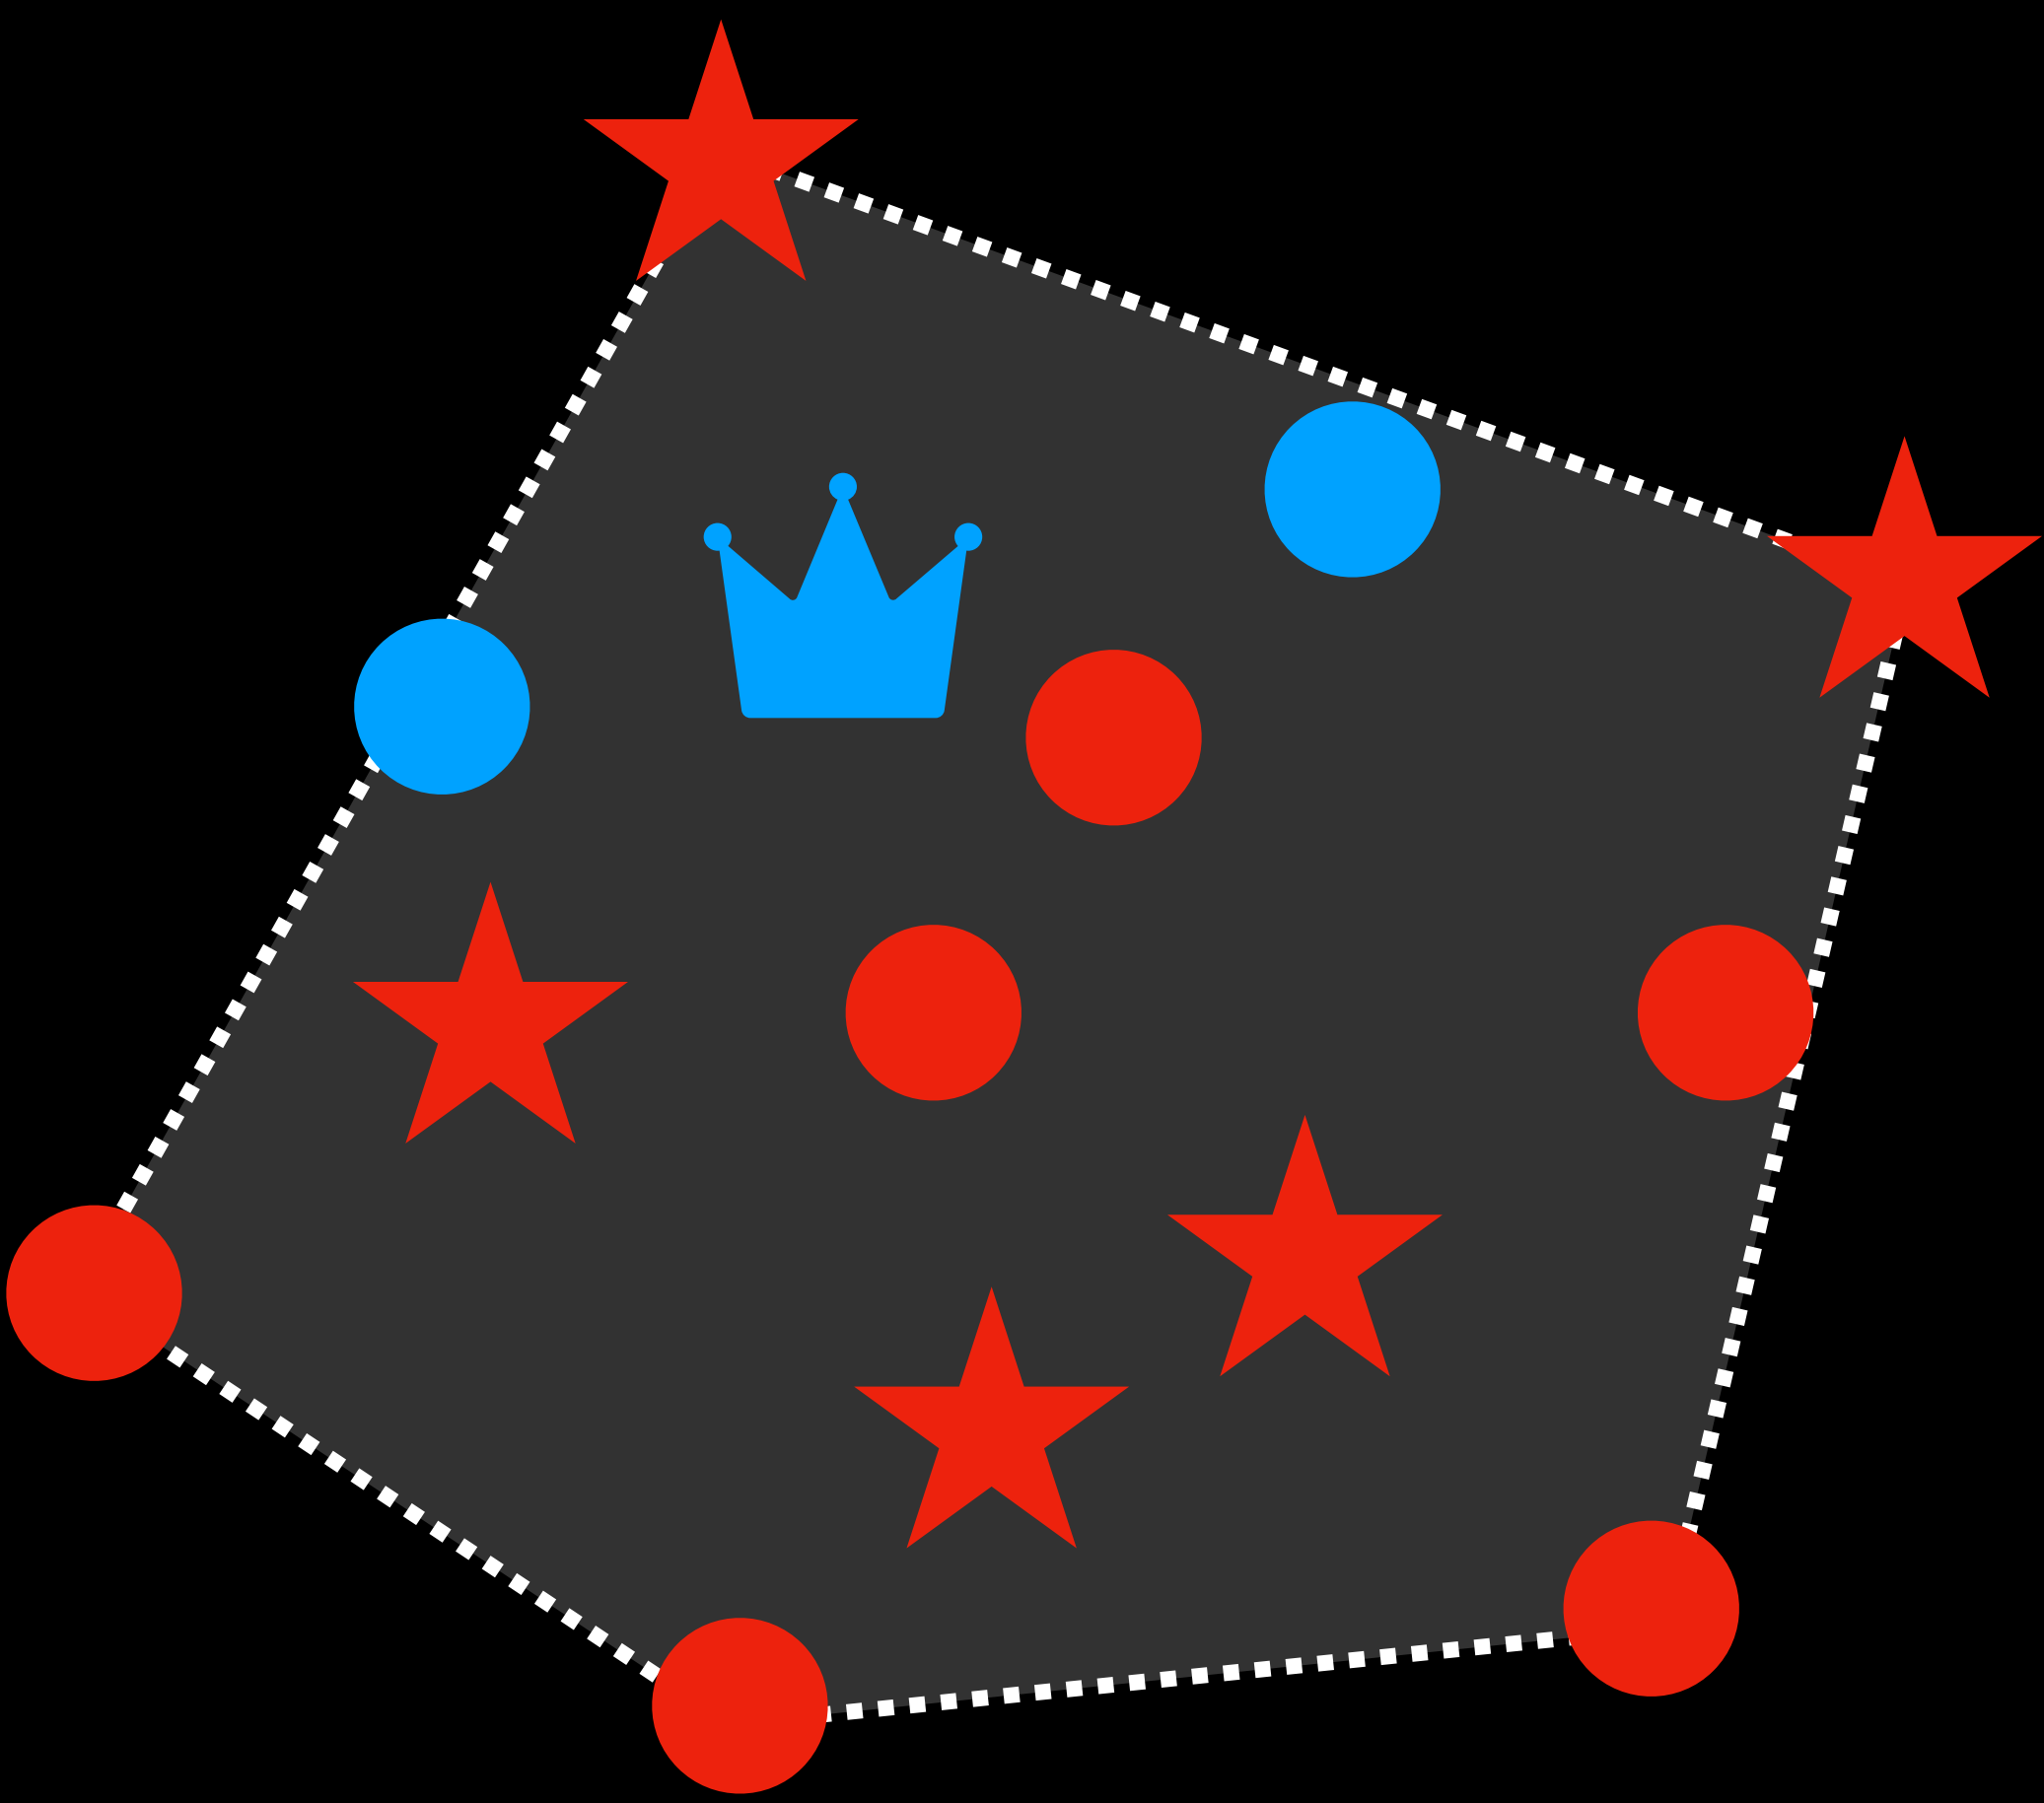

Conquering 40%+ of the Core Star Systems  
in another Faction's Border Region will make  
it a Neutral System.

-  King Star System
-  Core Star System
-  Star System

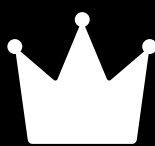

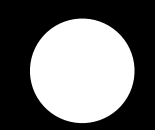

# Neutral Region

Contested

Without conquering the King system, a Faction can not claim ownership of a Region.
