

C4 Regions Explainer

Part 2: Regions Interplay

Regions

At the Launch of C4

Regions within a Faction's Safe Zone will be **Safe Regions**. The Faction will get full ownership of all systems within these.

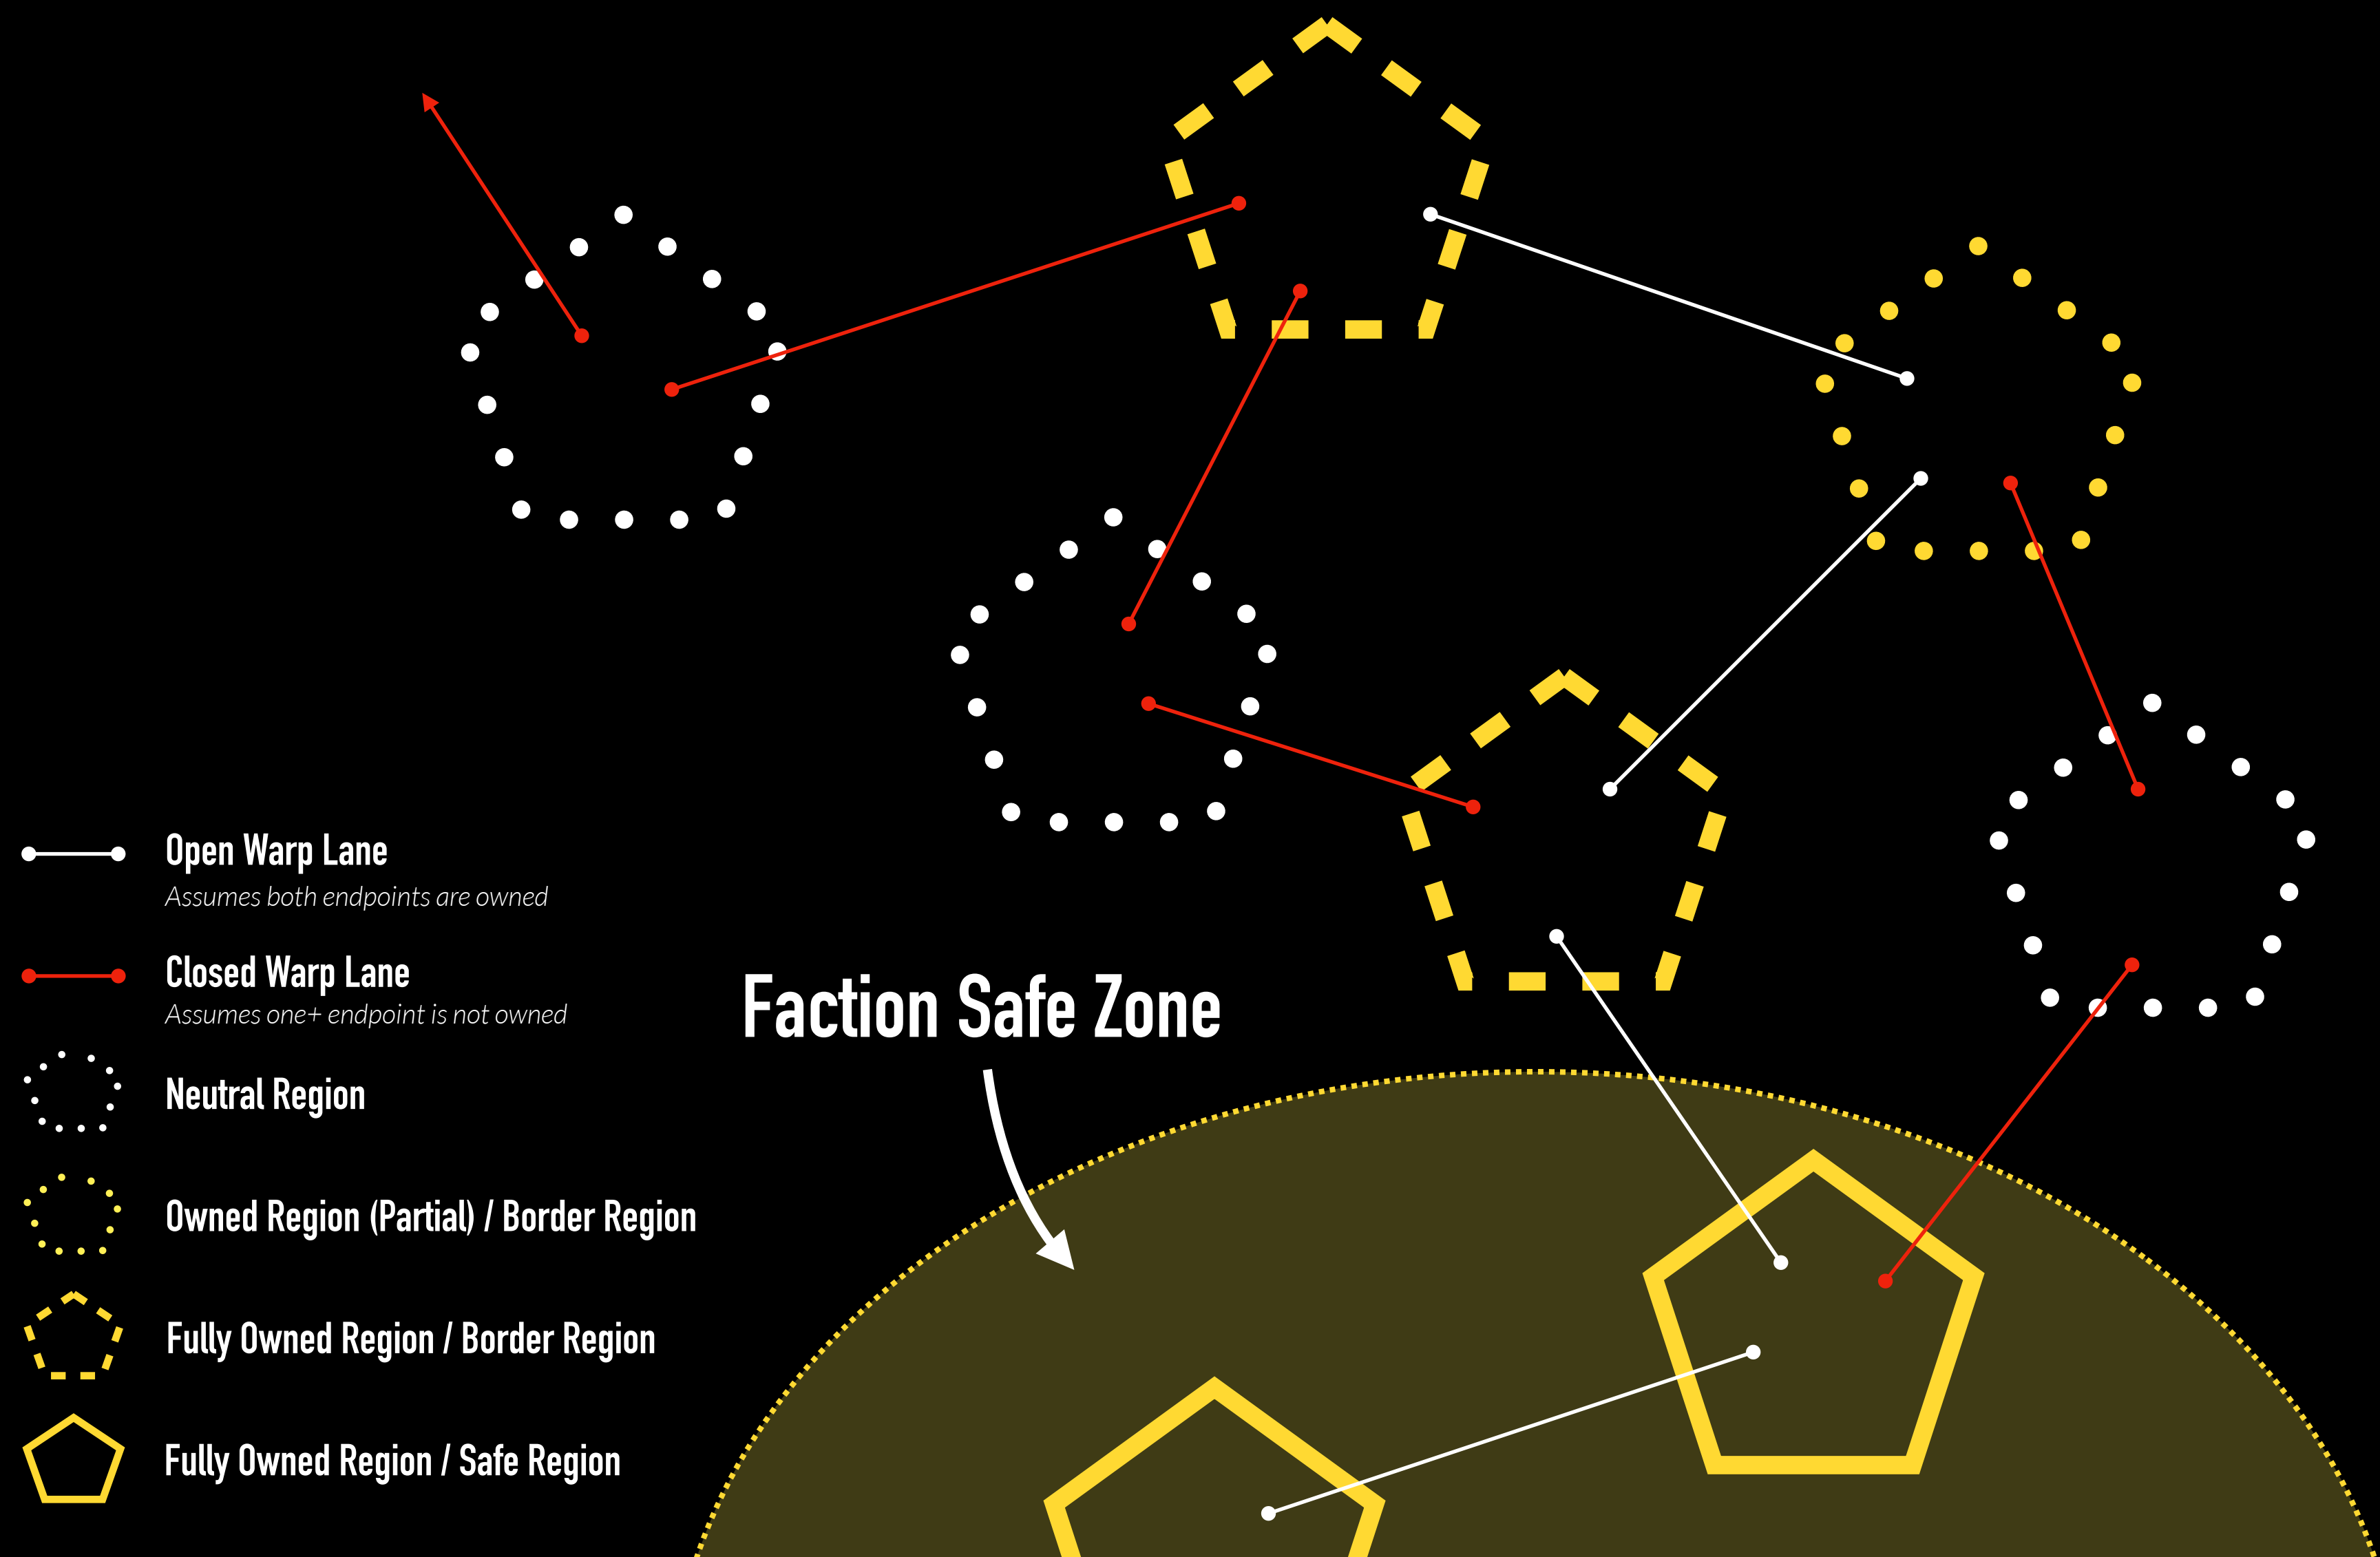

Regions in the Medium Risk Zone that originated from a Star System with a **Tier 5 Starbase** will become Border Regions as the Faction will **own all Core Systems and the King System**.

T1-4 Starbases will only give ownership of the King System. The Region will therefore remain Neutral.

Regions

Claiming Ownership

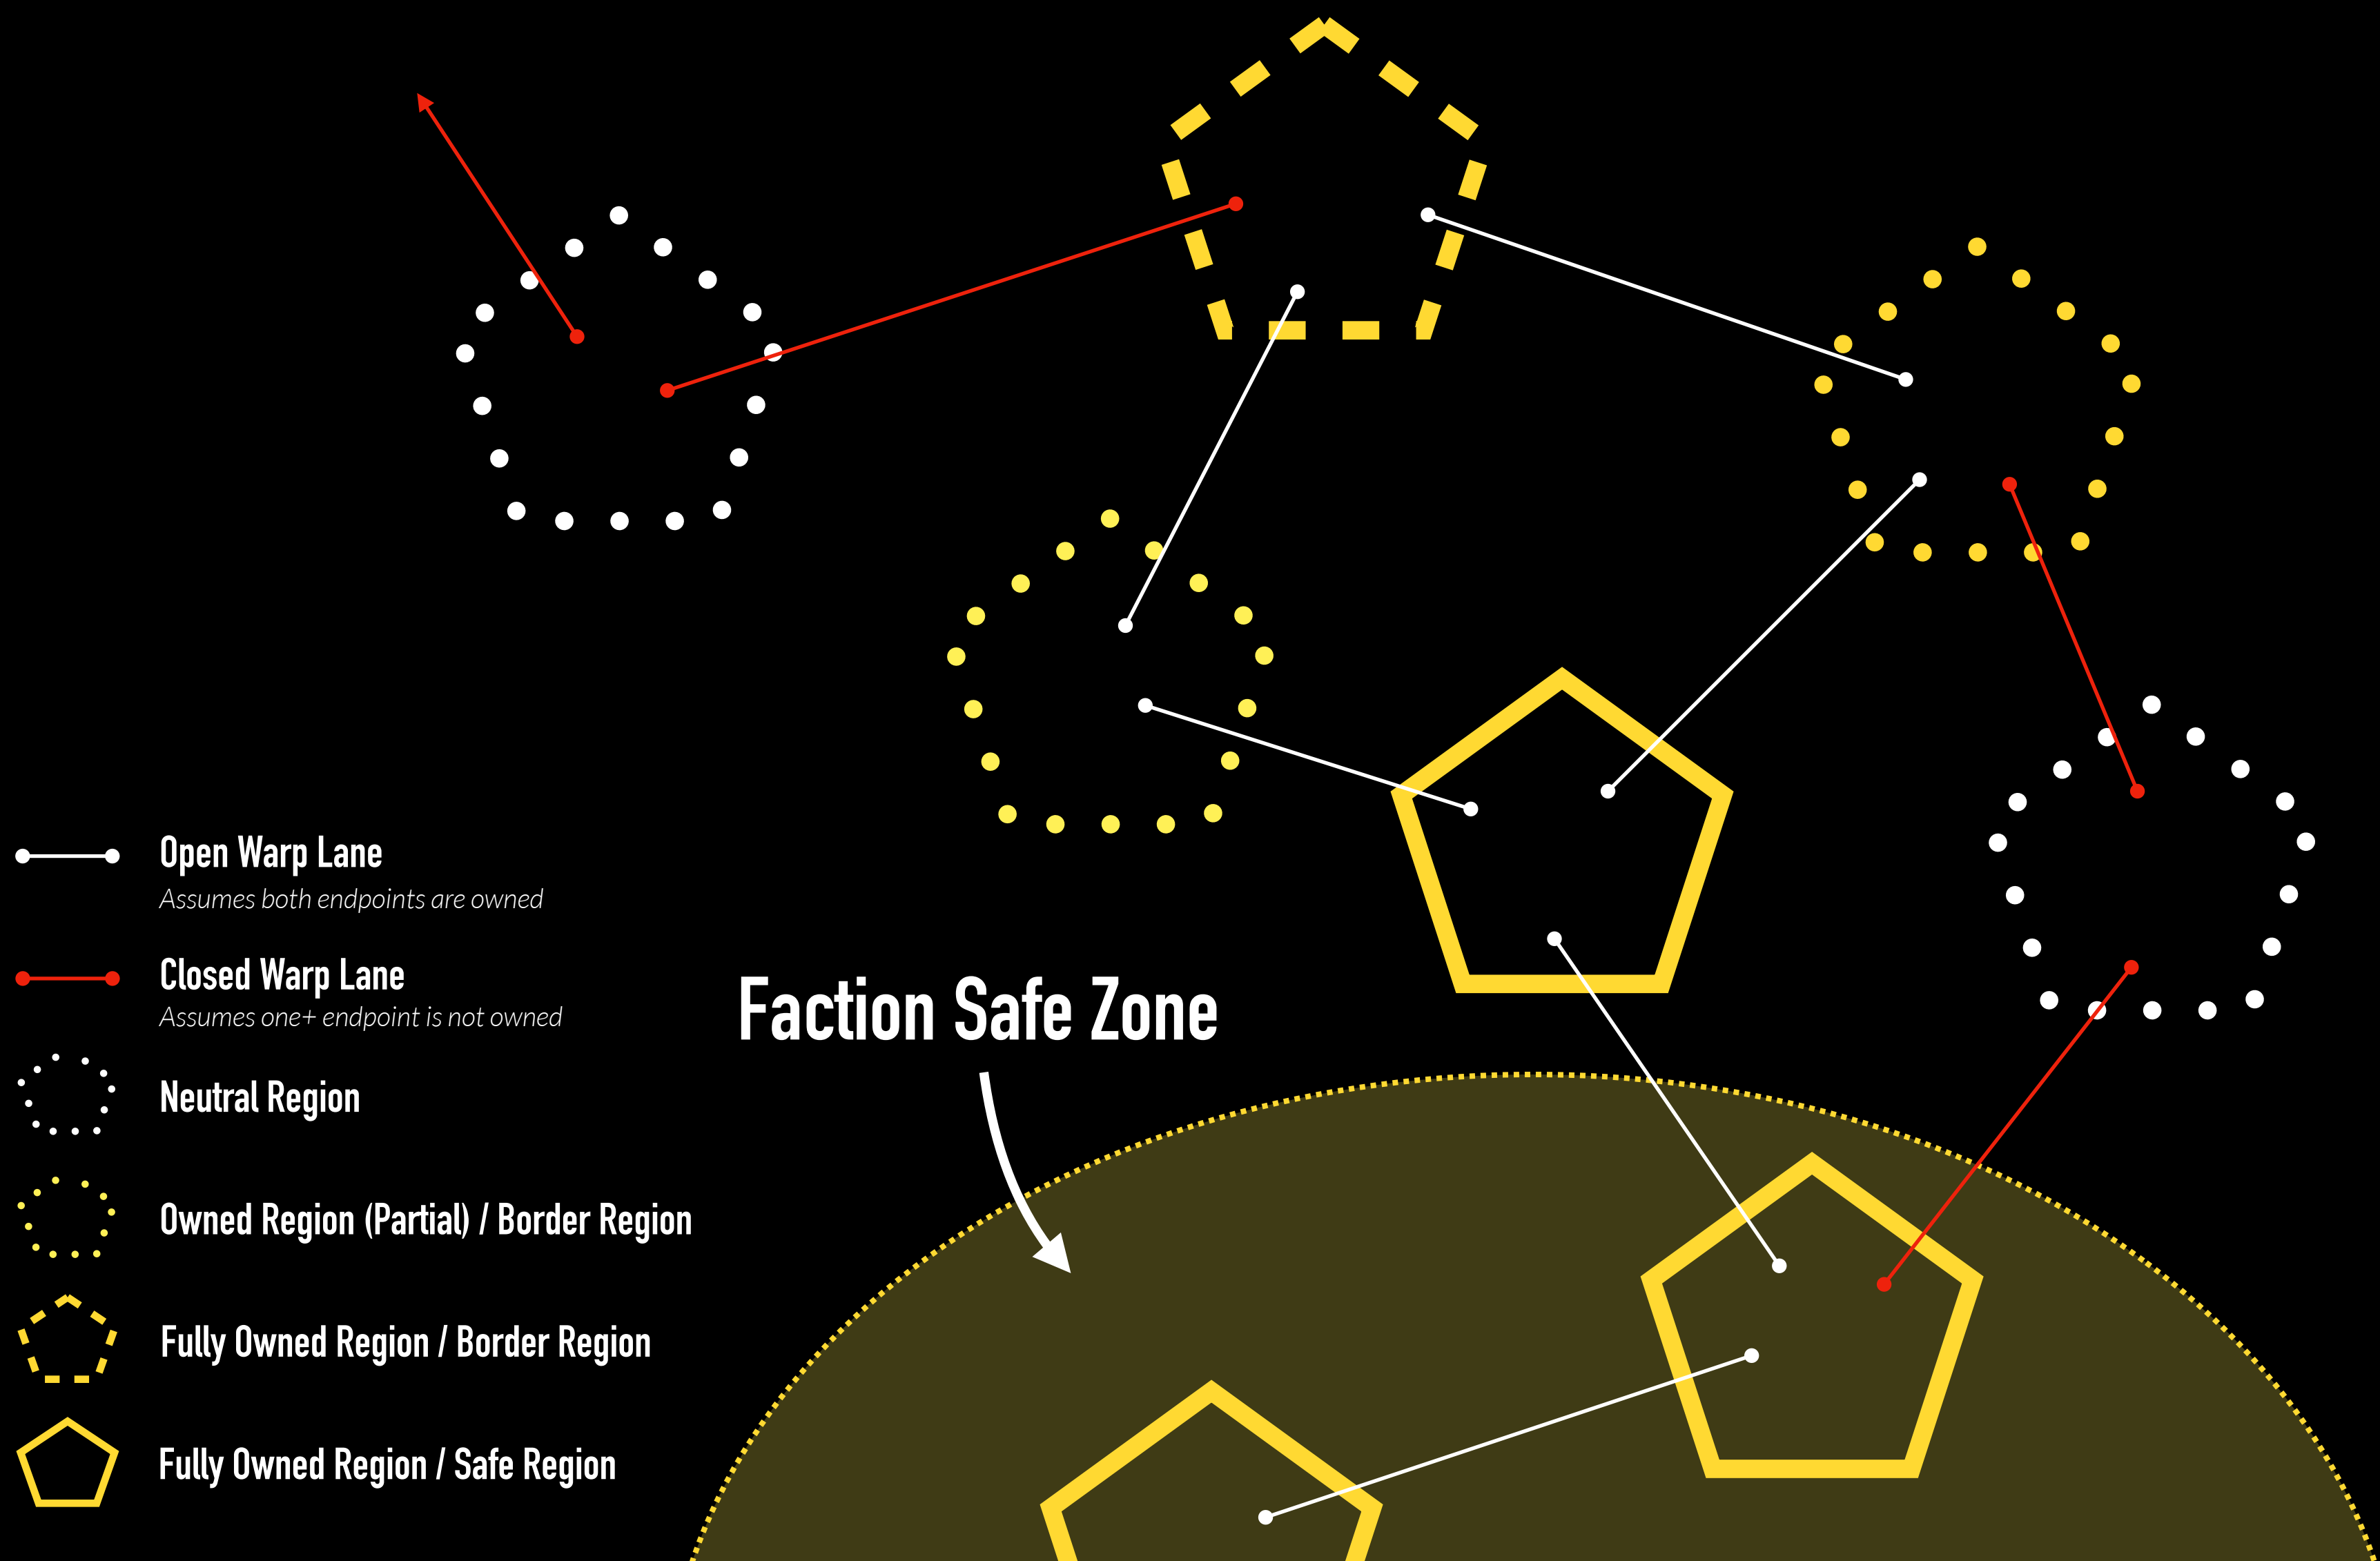

No region in the MRZ will be safe from the get-go, as no Faction will own all star systems within such a region

Claiming all the systems within an MRZ region may not change much, unless all regions neighboring it need to be Border Regions as well.

Regions

Safe Regions

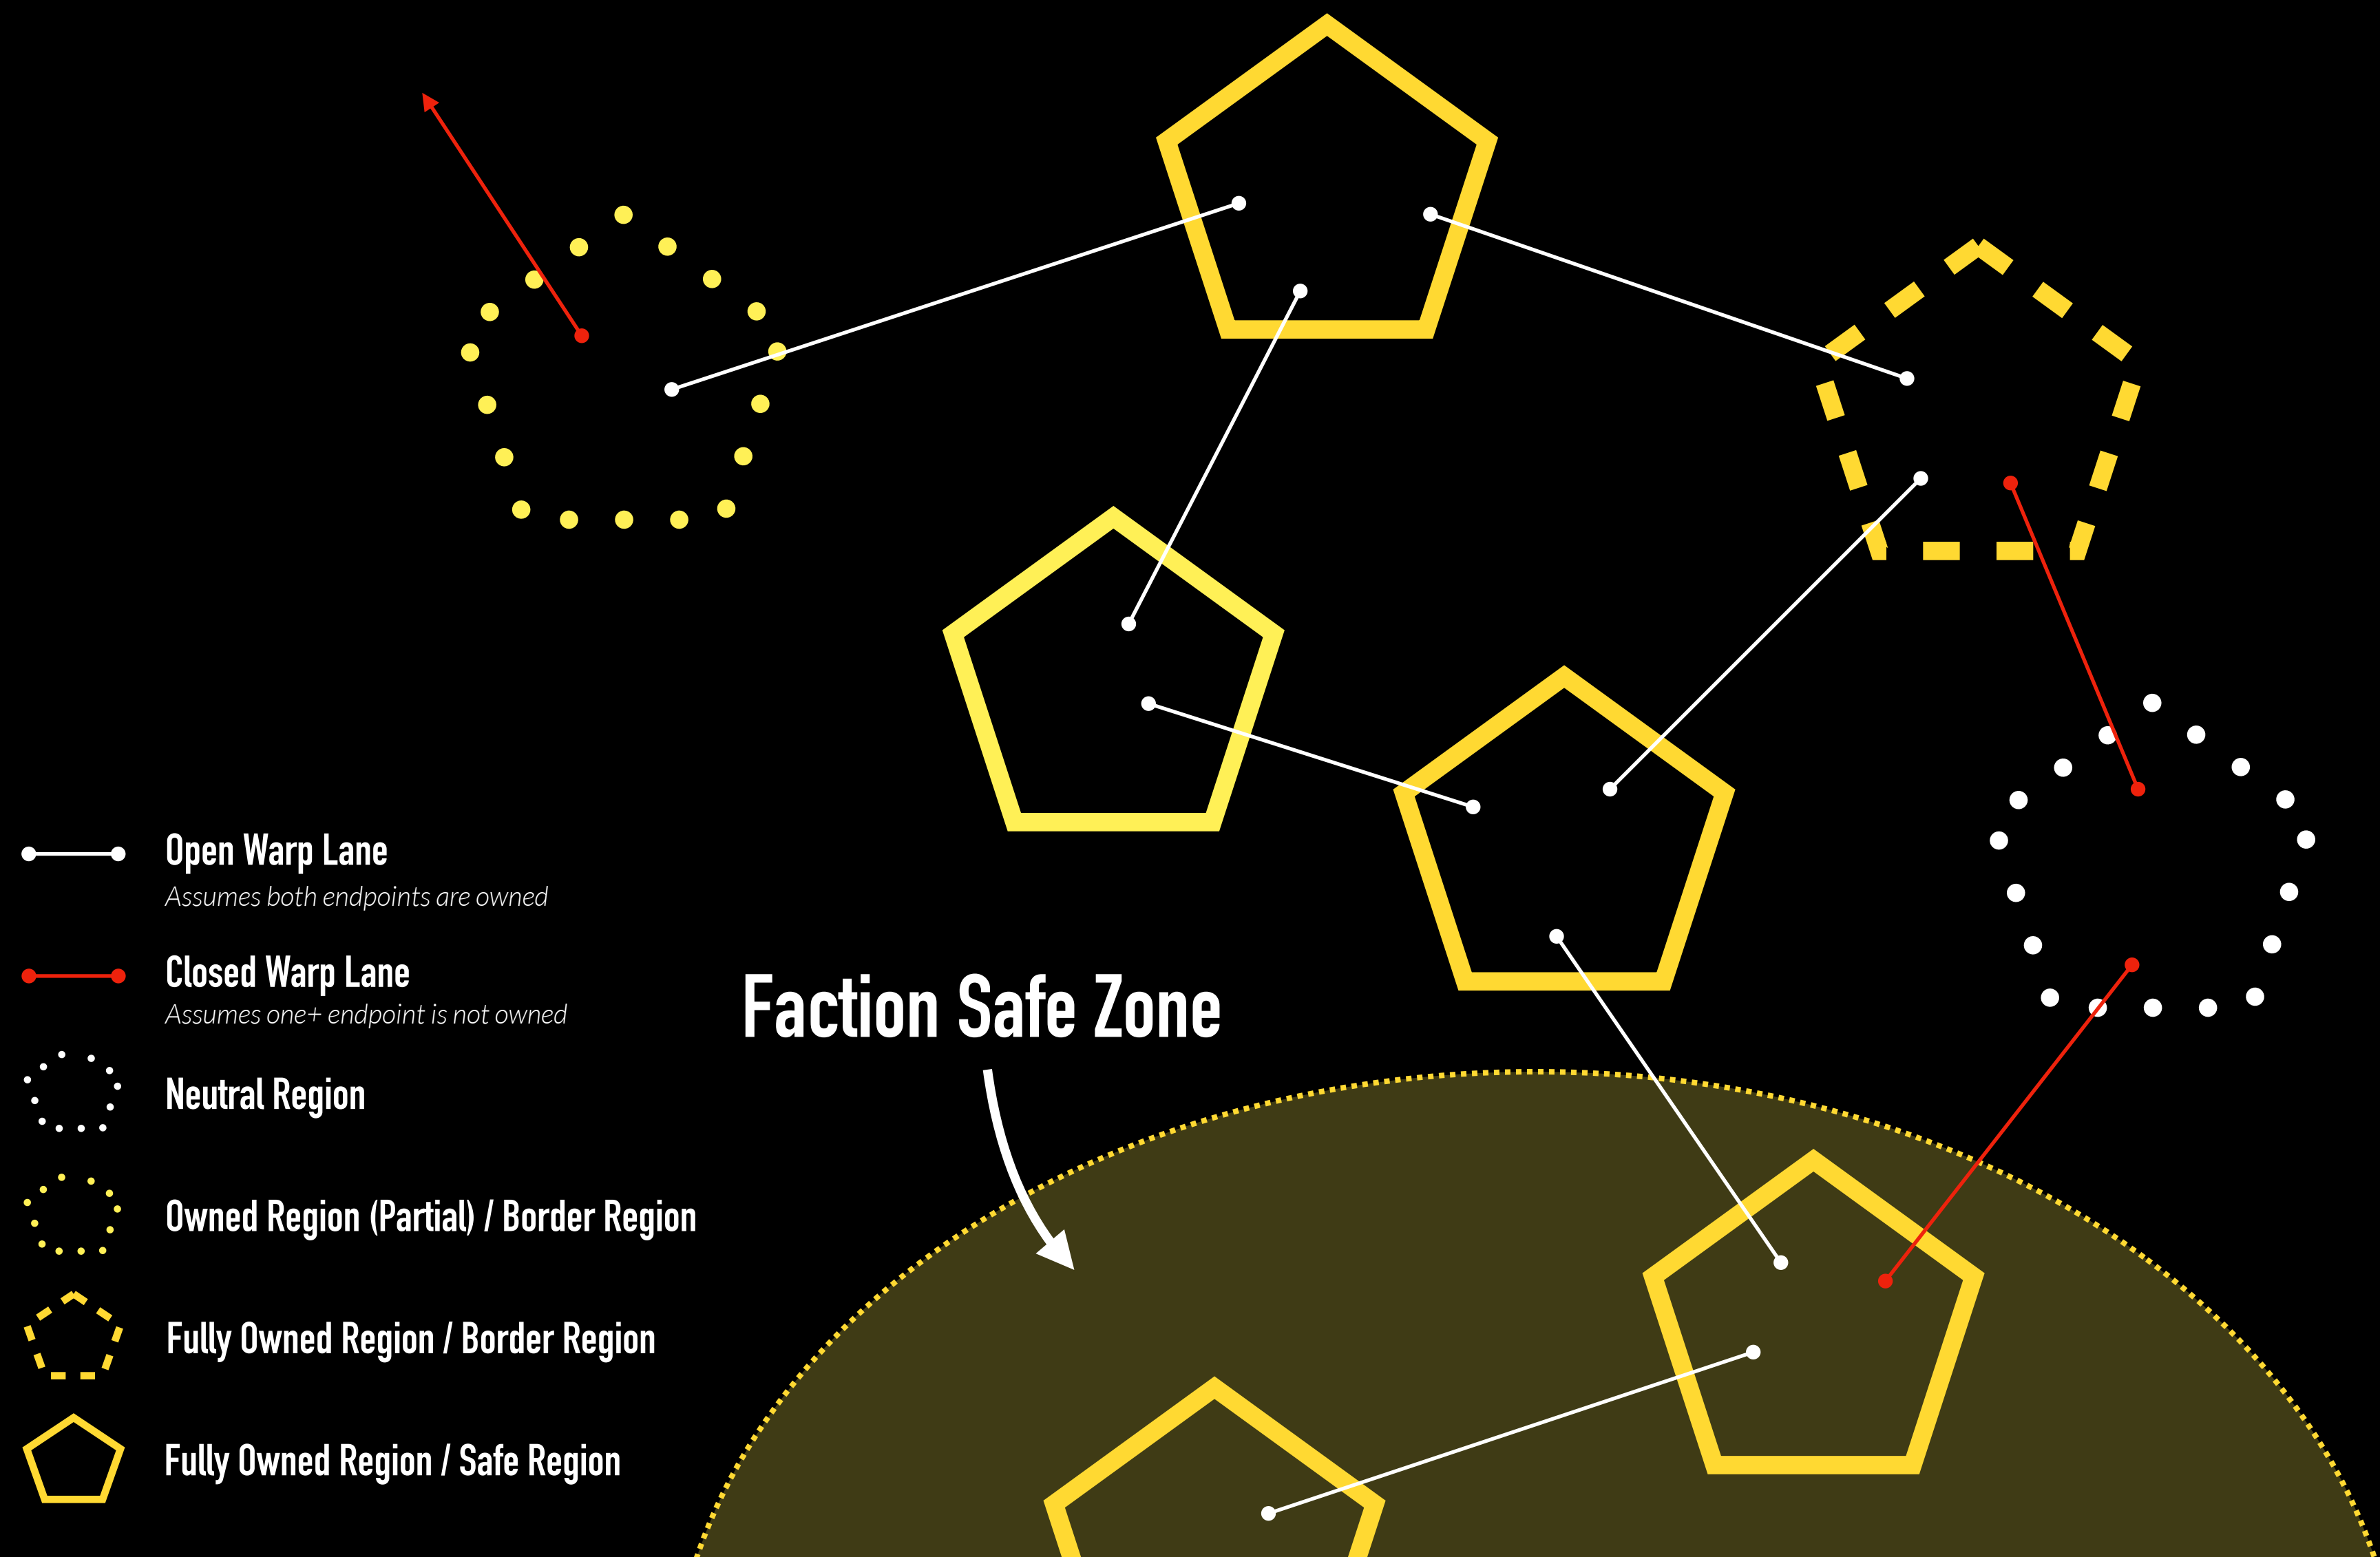

Claiming ownership of a Region whose neighboring (= all systems connected through a Warp Lane) Regions are all **owned** by the same Faction as well, will create a **Safe Region**.

Only Safe Regions can not be entered by hostile forces.

Expansion

Planning is Required

Beacause all Neighbors must be Owned
in order to create a Safe Region. **Careful
planning is essential to securing the MRZ.**

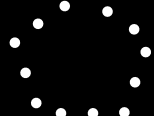

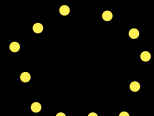

Incursions

Cascading Effects

Another Faction claimed 40%+
of the **Core Systems** in the Region

If another Faction claims 40%+ of the **Core Systems** in a Border Region, or its **King System**, the effects will cascade throughout the network of Regions.

-  **Open Warp Lane**
Assumes both endpoints are owned
-  **Closed Warp Lane**
Assumes one+ endpoint is not owned
-  **Neutral Region**
-  **Owned Region (Partial) / Border Region**
-  **Fully Owned Region / Border Region**
-  **Fully Owned Region / Safe Region**
